We would also loose a portion of the trade of the Eric Extension. It would certainly be much easier at any stage of water to take canal bonts laden with produce down the river, than tottow them up; it could be done too, we doubt not, at less expense——as a matter of course, then, we would lose the trade of this canal, and also of the Pennsylvania and Ohio Catal, if the the railroad is made to Wheeling or Parkersburgh or any other point bolow the Pennsylvania and Ohio Catales.

Some per Bo iess to believe that if we refuse the company right of way, the matter is ended, and that the railroad will never be extended beyond Cumberland. This is the extreme of fully. It is the interest of the compa- N ny to extend the road to the Ohio river-they are de termined to do so-and have abundance of mounts to to carry on the work.

It is, in truth, clearly the interest of Ponnsylvanie to grant the Bail Road Company right of way to Pitts burgh-and the people of the State can be satisfied that such is the fact, if we take pains to place the subject before them in its true light. All we have to N do to ensure the hearty co-operation of the people of the State, is to satisfy them in the first place, that there R is no force in the argument that this road will injure S the canal; secondly, that the productiveness of the canal

The country is undulating; sail very fertile; abun dantly supplied with water in never failing springs; thickly settled and remarkable for health. Namerous grist and saw mills are interspersed through the country, with large flour mills on the canals and river, affording a near and certain market for wheat and other grain. As a wheat growing country, these lands will rank with any in the State; and plaster of lands will rank with any in the State; and plaster of first quality brought through the canals from Sandus-THE subscribers have opened a new Tye Foundry ky, can be had at reasonable rates.
