We do not wish to traffic with the lives or health of the afflicted, and we sincerely pledge ourselves to make no assertions as to the virtues of this medicine, and to hold out no hopes to suffering humanity which facts will not warrant.  We ask the attention of the candid to the following considerations.  Nature in every part of hes warras, has left indellible marks of adaptation and design.  The constitution of the animals and vegerators of the torrid, is such that they could not endure the cold of the frigid zone, and vice versa.  In regard to disease and its cure, the adaptation is more or less striking.  The Moss of Iceland, the Wild Cherry and Pines of all Northern latitudes, (and Dr. Wistar's Bulsam is a compound and chemical extract from these.) have long been celebrated for complaints prevalent only in cold climates. Indeed the most distinguished medical men have averred that nature furnishes in every country medicines for its preculiar diseases.	Phonix Safes and Vaults.  The undersigned invite attention to the following certificate:  CERTIFICATE.  The undersigned having been requested by Messes. Constable & Strickler, to be present and superintend a test, by fire, of one of their recently invented Phonix Fire Proof safes, and deeming the subject one of very great public importance, have carefully securinized the progress of a test, to which one of said chests was subjected. The chest was supported at each corner, at an elevation of 10 to 12 inches from the ground fire of Bituminous coal and fire was made over and around and kept actively burning 5½ consecutive heurs. The fuel consumed was about 30 bushels of coal, and one cord of wood; the heat all the while being quite intense, and in the opinion of the undersigned much greater than a safe is likely to sustain in any ordinary house burning.  On the removal of the hre, at their request the chest was opened, and greatly to the assemblement of the undersigned and the large number of citzens present, a Blank Book with Sundry Bank actes within its folds; a piece of Dry pine Wood, were found warm undeed, but not in the Slightest degree charred or injudent the safe, which is of Wood, were found warm undeed, but not in the Slightest degree charred or injudent.
