From "Progress in America," a series of sonnets about our Relations with Britain, we take the following specimen:

"To keep us from our conquests, it requires
That we be conquer'd!—Bartles may be fought,
And we may lose them oft, as did our sires: Towns may be burnt, and frigates may be caught And navies sunk, and armies may be shin; And these may cool as till-we warm again! But these are checks, not conquests— Not turn us, from the onward destined way! As well attempt Niagara on the lens With all her oceans plunging o'er the steep, As hope to stay the torrent which moves on,

Steady, and still increasing as it flows.

And in Canadian wilds to melt their fettered snows." A beautiful piece of Poetry, "Spurn not the Guilty." by Miss C M Sawyer, we have laid aside for to-morrow. There is on article entitled "Some Reflections of a Free Trader," in which the writer admits in advance, that his labor is lost. He considers the system of

There are several other process in prose and poetry, which we may publish in a few days, but have not room to notice now.

the one before us has sufficient merit to gain a piace for it far in advance of most of its contemporaries.

The first article, entitled "Stock Gambling" is extremely interesting. It details the operations which are carried on by a set of money-changers in N York.

The famous Taciff resolutions were again before the shores of Great Britain. Six Robert Peel—England's bowerful and brillian Minister—has developed his fully powerful and brillian Minister—has developed his fully apposition, but woose remains behind.

The uteration to Oregon, are yet unsetted.

Wilmer & Smith's Times says:

This is not slight or cotemptically approached by the opposition, but woose remains behind.

The uteration of the Stock Gambling is extended to the public works. This statement of the daily transactions in Wall street, must take all by surprise.

In the article we are considering, the writer justly observes, that "all the wealth of a nation must necessarily consist of the proceeds of the industry of its inhabitants; and whatever of genuine credit exists must be a representative of some portion of that accumulated property.
