Mesers. Franchut and Du Motay, have projected a most startling mode of communication between Dover and Calais. They propose to accomplish this object by a tunnel, to be composed of a series of iton tubes, of about 4 motres long, with a diamiter of 2-1-2. The works being commenced simultaneously on the two opposite coasts, when the tube reach the water, other of this tube being closed in a disk in wood. The descending tube is to be suspended from a crane by a cord, which attaches itself, on coming in contact, to a sort of wheel fixed in the tube below, and the two having been before adjusted to each other, the locks of them together water tight, and then the wooden disk of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up the end of the obse is carried forward to close up
