The liver is more or less out of order in all attacks of fever and ague, so much so that the ague is not always curable unless the liver is first set right. Attempts to check Agues by Quinine, when the Liver is diseased, trequently brings on general Dropsy. If the Liver Pills be used before taking quinine, and cautiously continued after it, so as to keep the bowels open according to the general directions, not only will return of chills be less frequent, but the cure will be more perfect. The Liver Pill is particularly useful in all agueish sections of the country. In all regions, the liver, is so often in a bad state as to be concerned in producing a large portion of their maladies. Let the resident population give it a fair trial; keep their bowels open with the pillstake in each case twenty grains of quinine between the chills to check them, and fifteen grains every eight or ten days afterwards, for several weeks, and they will seldom need a physician for Ague and Fever.
