In its natural history, if you please, the Wilson Pill differs from most other preparations in not being originally made for sale, or with a view to pecuniary profit; while as every body knows, the greatest tyro (as a general thing) no sooner begins to dabble in drugs than he casts about for some cheap preparation, or must 'get up,' as the phrase is, something—anything that will sell. Often he attempts it under an assumed or fictitious name, as though conscious his own were insufficient to sell it. The difference then between the Wilson Pill and the preparations I have just indicated, would appear to be this: The consciousness of the value of my pill originated the idea of putting them on sale for money, and at a price. The consciousness of the value of money originates in most instances the many preparations I have alluded to; and the price most likely 'to take' is always first; carefully considered, and the pill or other preparation made and graduated to suit it. The one is a discovery, and comes from the great Arcana of Universal Nature; the other a trick or invention, and comes from a not very popular quality of Indiversal Nature. Reader! the difference here is great. In one instance the value attached to the PILL is the starting point; in the other, the MONEY. But it is not probable that some of the many preparations having even such paternity were accidentally good, but that possibly by this process of "getting up" as they call it, by puffing and blowing, as we clean wheat, they have been "got up" too high be fore their specific gravity had been carefully ascertained, and have blown off never to be heard of, with other chaff—some lighter, some heavier.

Whatever may be the rationale, I must repeat it, that I am most profoundly thankful to my friends for their discrimination in not consigning my discovery to that compendous category of "inventions that did not answer"—of "tricks that went."
