Raton-Sir: I am a Piano manufacturer spection. Captain M'Callum has spared no expense in and have lately used Hopper's Patent Bench Plane, and at

your request I will state what I think of it. For planing reneers it is the best thing in use, in fact the only kind Plane that can be well used for that purpose; and one ma. can plane as much veneering in one day with it as he could scrupe by the old method in six days. It leaves, too, a much more even, smooth and solid surface than the scraper, an one that will absorb less varnish or paint. It is for all kinds if fine wood work the best Plane I know of. It is so constructed that it takes up, and can take up, but a very thin chip, and can be used against the grain as well as any way This makes it peculiarly valuable in planing veneers. shall never scrope any more veneers while this Plane can b obtained. It must come into general use, saving so muc time and doing such nice work as it does. H. U00DALL, Third st., No. 128.
