Pittsburgh, December 27, 1855. Mn. Moses F. Earon:—Dear Sir—It affords me pleasure to be enabled to state, after a thorough trial of Mr. Jos. Leeds' tubular Furnace or Heater, that it fully answers the purpose of supplying my dwelling with a pleasant and properly warmed air. I cheerfully recommend it. Yours, WM. F. JOHNSTON. Mr. Moses F. Eaton—Sir: I am a Piano manufacturer, and have lately used Hopper's Patent Bench Plane, and at

ur request I will state what I think of it. For planing meers it is the best thing in use, in fact the only kind o veneers it is the best thing in use, in fact the only kind of Plane that can be well used for that purpose; and one man can plane as much veneering in one day with it as he could serage by the old method in six days. It leaves, too, a much more even, amouth and solid surface than the scraper, and one that will alsorb less varnish or paint. It is for all kinds of fine wood work the best Plane I know of. It is so constructed that it takes up, and can take up, but a very thin-chip, and can be used against the grain as well as any way. This makes it peculiarly valuable in planing veneers. I shall never scrape any more veneers while this Plane can be obtained. It must come into general use, saving so much

and the sum of this valuable is the strict than the scraper, and one that will also be savariish to paint. It is for all kind in the sum of this valuable is the sum of the word work the best Plane I know of. It is so constructed that it takes up, and can take up, but a very thin chip, and can be used against the grain as well as any way. This makes it peruliarly valuable in planing veners.
