Patent Finishing Plane.

The invention is intended for new where it is desired to impart a fine smeeth, and gives y surface to the wood; but it is applicable, with a ventual, to all kind of carpenter's planes. The new its consists in placing the cutting chisel or lift, in footiet the weige instead of behind, as in common planes; also in applying a metallic mouth-piece to the face of the plane, as the next here is a which never him planes, and the chief, which never him planes, and the chief, which never him to the chief, and confines the threat of the plane.

Let the nearth piece is a close to the edge of the bit as to present in plane from ripping or splintering the wood in the least degree. Indeed, we have seen the implement applications of the stormach and indigestion. She had been under a physician's care for some time, but the disease seemed to baffle or his skill. She purchased some Holland Bitters at our office, which has given tone to be stormach, her appetite and strength are returning, and we firmly believe that this is another great cure effected by your medicine.

We have still or record many wonderful cures effected by this remedy, but must wait another opportunity. One thing your new that the disease of the plane is the cord of the plane.

But the nearth and confines the threat of the plane.

Let the nearth piece is a close to the edge of the bit as to present in place the plane is a proper to the cord in the plane is a proper to the plane.

Entered the plane from ripping or splintering the wood in the plane is a proper to the plane in the plane from persons much respected in our community, and are literally true.

J. Quintrue, thed to the planing of wood against the grain, and transversely to the gradu, leaving the wood perfectly smooth. So with the use of a cap or woulde lat.
