GEORGE SCOTT, OF COLUMNIA CO.

JACOB FRY, Jr., MONTGOMERY CO. TIMOTHY IVES, POTTER COUNTY. THE WAR A MISTAKE.

It is quite fashionable in Paris now to say that the war was all a mistake. Of course it was Russia that made the mistake, and not Louis Napoleon. And it is said that Count Orloff, the Russian envoy, declares that had Nicholas known the French Emperor and understood his England, France, Turkey and Sardinia as many the more. England has lost her reputation as a first class military power. The Turkish Sultan has lost his independence. The Mahomedan religion has received its death blow in Europe. Sweden has lost its opportnity to recover Finland. Austria has lost the much needed friendship of Russia; and Prussia has lost the respect and confidence of most of the German States. There have been large losses all round. But the gains are small. France has gained glory. That she loves more than anything else. England has gained wisdom in regard to her feeble aristocracy. Russia has gained the reputation of being the first military power of the world; but has learned that Constantinople must be waited for a while longer. Austria has gained the free navigation of the Danube, and a foothold in the Danubian provinces. Turkey has gained the great mistake."

And who made the mistake? It was no doubt the Emperor Nicholas. He thought England felt sure that without such a combination his conquest of Turkey could not be prevented. He Europe has paid dear for it. But the peace is delayed. Its traditional policy is not abandoned. Constantinople must be a Russian city, the Black Sea a Russian lake. A few years of peace will double the power of that empire. She will double the power of that empire. She fear of unisconstruction, phrases which party has onty a truce, and Russia's great purpose is only wants railroads to develope her vast agricultural and mineral wealth, and to concentrate her power. She wants a milder and more liberal govern-

THE attention of Shingle and Lumber dealers, speculators and others is directed to this invaluable invention, which is now presented to the public the first and only practical machine extant, for Riving a the first and only practice.

Showing Shingles.

Various cutting and sawing machines have been invented for making Shingles, but it is a well known fact that Shingles cut or sawed across the grain are quite its dimey for reading purposes. Numerous inventions have recently special for riving and shaving, and those have all been continuously an worthless, from their imperfect method of riving
