LOCAL AFFAIRS. SATURDAY MORNING

Reader, did you ever see the ore-diggers taking from the bowels of the earth great lumps of sancal Freight Agent, T. S. Rodgers. dy, cindery looking material? If you have seen them doing this, perhaps the thought never occurred to you that, contained in some of these lumps, was a coffee-mill, that would soon grind the rich Java you love so well for breakfast, or a lock that would protect you in your slumbers from the dagger of the

midnight assassin, or a hand corn-mill, with which you could yourself, in a few moments, grind enough been swindled. Rather an extensive case to take to corn to make you fresh mush every evening, for several days, and a great many other things too tedi Dro ous to mention. These thoughts were suggested rowned yesterday, while bathing in the Ohio river, to day while taking a walk through the new Variety opposite Haysville, a point on the Ohio and Penn-

Works of Messrs. Warwick, Atterbury & Co. When we reflected that the innumerable, beautiful and sylvania Railroad. useeful articles which were shown us by Mr. Atter. Dr. Beil's Opinion of Hostetter Bitters bury, were once tumbled out of a bank, in the shape of an unsightly mass of ore, we could not help wondering how manufacturing had been brought to such Messrs. ners in this firm, and are both intelligent and industrious mechanics. Scales, looks, latches and coffee mills, are the principal articles manufactured by them. The locks, of which they make three kinds, are patented by themselves, and it seemed to us if they had not succeded in covering the whole ground, ir the lock business there was no use in any one else trying. They received the third patent for a lock yesterday, which is the joint invention of Warwick & Atter bury. It is very simple, and is suited to doors of all r by tasting it. kinds, as are both their other locks. The great adwantage of all their locks appears to be their simplicity, and the fact that they can be used either right or left handed. Coffee mills are manufactured at the Variety Works, at \$2 50 and \$3 per dozen, while a few years ago, nearly half the first amount was paid for one. A very important fact connected with this establishment, is all the work they manu facture is done within its walls. We have not time at present to speak of one-third the new things we yesterday examined, but cannot close without speaking of a corn grinder and self-adjusting wronch. The corn grinder i Warwick's patent, and we feel confident that every one who lives five miles from a mill, would save in three months, in time occupied in going to the mill alone, the price, which is \$7,00, of one of these admirable machines. A little boy can grind with it two bushels of corn in an hour, and have the meal already sifted. It is a great invention, and should be seen to be fully appreciated. Warwick's self-adjusting wrench is a great in
