Ignorance qualifies for nothing. If knowledge be power you increase the effectiveness of labor when y from them than from any other source that will

Another want of farmers of which I am now to speak is sagricultural schools. I do not mean schools in which our sons are to have their heads filled with fanciful conceits and expensive theo ries of agriculture, but schools where solid learning shall be imparted in connection with practised spriculture—where the principles of science purpose in represeing the vain imaginations of shall be taught, not as abstractions, but with mere theorists. But when that sound sense, noapplications to every department of the farm.
I said this Society had encouraged, the foundin said this society had encouraged in the said this society had encouraged in the said this said this society had encouraged in the said this said State lying in the choicest latitudes of the hemissing of one such school. A wealthy and public I advocate, the educated farmer will be armed and spirited citizen of Centre county has given a reluable farm in that beautiful vailey which his country may call him, and shall be able to

bears the name of the venerable founder of our guide the affairs of state with the same discre rious sources suitable buildings have been begun and will be ready, it is hoped, for the opening of the school asjearly as next spring. The trustees, who are men of sagacity and prudence, are manaking their limited means with strict economy, and if properly sustained by an enlightened Leall it ought to be In the minds of some of the best friends of

this enterprise serious objections are entertained to the location of the school, but it is believed ontains some of the best farm land and some of he best farmers in Pennsylvania. No where are actier crops of wheat and corn produced than in most healthful and beautiful portions of the latter is the farm school to be planted. It was the generosity of the donor which determined the location. The objections have reference princi-pally to the want of water and the distance from railroad communication. The first of tuese obections I am assured can and will be obvinted, and as to the latter I have never felt its force. The school will be some twenty miles from the Central Railroad and in my judgment that is near enough. Boys had better be away from the temptations and annuyances peculiar to rail on is, whilst acquiring education. And surely ber can travel twenty miles without steam i

But the best way to obviate objections, whether real or fancied is not to oppose this school but to Similar schools are needed in other parts of the State. There ought to be one in the East and one in the West immediately. There is unemployed capital enough in the two great cities t the extremities of the State to found and en-

boys enough to fill them. It is a mistake to suppose that our common schools are sufficient for the agricultural classes. They are taught for the most part by young men resentance I should contain he of the same users to months to learn something of the very rudito de d'a common English education, and who witten, as let faul as ever of nil the schilments. what is premium to their work. Say the treasury on every point of sugar they correctly of the country and any the treasury on every point of sugar they correctly of the country and a sum, and that this tax is kept up so that the correctly the sum of the treasury on every point of sum, and that this tax is kept up so that the correctly the sum of the treasury on every point of sum, and that this tax is kept up so that the correctly the sum of the treasury on every point of sum of the treasure of the third na school fitted for his advancement.

shelter for their manures and systematic habits in the preservation of them, and they will be a I have hinted at the intimate relations which in a school fitted for his advancement.

er than those who, forty years ago, passed the ifteen hundred dollar act. Let the people roply.

We are much obliged to Hon. David Ritchie for a valuable volume and map relating to Central America.

\*\*\*Fall Style:—We will introduce on Saturday, tral America.

\*\*\*MOBGAN & CC. 164 Wood stress of the farm, is growing the interpretation of the farm is growing the interpretation of the sea for manures when we shall have exhausted the resources at hand. We often overlook the blessings we have, in quest of the interpretation of the sea for manures when we shall have exhausted the resources at hand. We often overlook the blessings we have, in quest of the interpretation. All instinct with life, they shall have exhausted the resources at hand. We often overlook the blessings we have, in quest of the interpretation. All instinct with life, they in receases to profound and mysterious for hundred on the sea for manures when we in receases to profound and mysterions for hundred on the sea for manures when we shall have exhausted the resources to profound and mysterions for hundred on the sea for manures when we have the master house comes to see

For these reasons I do not believe the high prices highest instincts of his nature bid him to enter minures or condemn our lands as sterile and mechanism can supply the place of manual labor the mind unfits the man for the labors of the horned cattle and better breeding.

It is sometimes objected that the cultivation of on the farm; whether the steam engine, that farm, and doubtless it is the great fault of some street to the purposes of the farmer; whether elected to the purpose of the farmer is the purpose o

they take too little interest in the doings of the society, and counsel more sympathy, more participation, more patronage, I point them in the direction in which, sooner or later, they will find direction in which, sooner or later, they will find direction in which, sooner or later, they will find direction in which sooner or later, they do and why they do it was and nothing is wanted but a segerous soon of cities—the power of armine. It is even of cities—the power of armine and money in selecting breads, and money in selecting any of those many stations in civil government to which, under our happy constitutions, they are liable at all times to be called. and our executive offices. The purpose in repressing the vain imaginations of equipped for any intellectual conflicts to which

tion as the affairs of the farm. We want agri-Next, we want smaller farms. As a general man have capital enough to stock and carry on s mited means with strict economy, rly sustained by an enlightened Lecommunity will make the college of be
add of some of the best friends of argely. And there are some advantages pecuiar to large farms, such as a greater diversit to the location of the school, but it is believed these will gradually give way. Centre county the man of large means has a perfect right to ourchase to him he capital employed in carrying on farms i very small, and the size of farms roportion to the means invested. It is a disressing sight to see fields half tilled. arming is pernicious as an example, it corrupts and finally kills the soil, and degrades the cause f agriculture. It is not for me to say how many cres a farmer ought to cultivate, but I will say hat he ought to attempt no more than he can cultivate thoroughly and well. If, instead o currying his sons off to the West, as they grow

nto manhood, he would divide his farms two or three hundred acres among them unil each of them and himself should have but prise me to bear that he and each son had ry can travel twenty miles without steam in found fifty acres properly cultivated more productive than the whole had been before. The Romans illustrated the importance of the rough tillage by the following apologue: A vinedresser had two daughters and a vineyard; when his eldest daughter was married, he gave her a third of his vineyard for a portion, notwithstand ing which, he had the same quantity of fruit as ormerly. When his youngest daughter was married, he gave her half of what remained, and l. w such schools, and there are unemployed ed. This resulted from his bestowing as much still the produce of his vineyard was undiminish labor on the third part left after his daughte had received their portion as he had been accustomed to give to the whole vineyard. My impression is that Pennsylvania farmers might rethen comes commerce, and with it the merchant, and women who have had no experience in either practical or theoretical agriculture, and who have not mastered those natural sciences on which the ing a characteristic of us as a nation, and in general sciences on which the ing a characteristic of us as a nation, and in general so honorable, have taken an unfortunated in the end of the farm. It was a beneficient appointment of Providence that thus linked together and made mutually dependent appointment of account. rection in lictating the size of our farms. I do linked together and made mutually dependent not, know how large a farm Cincinnattus cultiva these great occupations of society. Hostility ed, but I think it did not exceed three acres to the win the algebraing lays of spring to the When Dido landed on the coast of Africa, the inhers of the human body. As well might the habitanta, disposed to be hospitable and gener-

portion of ground than was intended, she had What God had joined together a not man pur-less territory for the magnificent city and state . Sun fer the third individuals the thought prod Carthage than most Pennsylvania farme posters and occupy And, nowadays, in the densely populated districts of Europe, five acres are considered an ample field and verge enough With the increase of population in Pennsti iams, which I trust may be perpetual, our future

Th population of a rural district, the better roads you will have -more social relations-more gislators which would restrict farms to a given measure, but to be promoted by a sound public opinion founded on observation and experience More care of manures is another want among l'ennsylvania farmers. On this point, as on al others, I speak in a general sense. I rejoice t

But I have seen many a brave barn situated on the brow of a bill with a yard stretching down the slope to the public road, the accumulations of the winter scattered here and there all and the public road, the accumulations of the winter scattered here and there all and the public road, the accumulations of the winter scattered here and there all and the public road, the accumulations of the four winds of heaven to bless the the winter scattered here and there all and there all and the public road, the accumulations of the four winds of heaven to bless the the winter scattered here and there all and the plenty." the winter scattered here and there all over the hill side, sometimes frozen and then thawednow drenched with rains, and now dried in the sun-every particle of virtue crushed out beneath the hoofs of uncomfortable beasts, and exhausted remainder—mere husks and shells on to his fields and calls that manuring them, appointed, he concludes his land is worn out, money and to regulate the value thereof. This sells it at half price, and goes off to the West to power has been exercised, and we have a metallic

ou foot in several of our sister States for their organization, though I am not aware that any are yet in operation. If Pennsylvania shall ited the way in a sound and enlarged agricultural education as she did in building turnpikes, bridges and railroads, it will constitute another claim to the honored title of the great Pioneer in the may be seen in almost every farming district of the control of the great Pioneer in the state of the process of the presence of all to be unighted to Ephron in the presence of all to be unighted to Ephron in the presence of all to be unighted to Ephron in the presence of all to be unighted to Ephron in the presence of all the unighted to Ephron in the presence of all to be unighted to Ephron in the presence of all to be unighted to Ephron in the presence of all the unighted to Ephron in the presence of all to be unighted to the unight by will amount to.

We call upon the people to remember that the same Black Republican majority who passed this infamous \$6,000 bill -who refused to pay the solition famous \$6,000 bill -who refused to pay the solition famous \$6,000 bill -who refused to pay the solition of the Union—they could not gradied and solition the duty on sugar and other articles of necessity, if they had seen proper to do so! But they and seen proper to do so! But they are seen in the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they and seen proper to do so! But they and seen proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the famous \$6,000 bill -who refused to pay the solition and proper to do so! But they are seen to the solition and repeated to the seen and the their transmitted and manual seed to the solition and repeated to the solition and repeat

as he who has eyes.

And when we shall have begotten a generation large districts—several countie.—where soil and large districts—several counties. an inattentive observer of men and things, he knows no better way of improving the present than non any other source than the doings of the knows no better way of improving the present they take too little interest in the doings of the what they do and why they do it—we shall have and nothing is wanted but a larger outlay of care lectest stock can be raised in Pennsylvania, and the state of the market proves that the business, pursued in proper localities and in approved tive of all arts. Humble as are it modes would pay. I would encourage our opn-I love to see farmers in our legislative halls, lent farmers to procure the best of stock and to rear carefully. Whether they be hogs or sheep, horned cattle or horses, let them be of the best breeds, cost what it may to obtain them. It means are small buy few, and mean; will increase. If at a loss as to the best modes of rearing, conult the experienced breeders, who will always

> Well bred horses and good beef and mutton re decisive of a high state of civilization, whilst had beef and unsavory mutton are a reproach to agriculture. What pains do we take to celebrate

There is one thing of great importance to farmes, not wanted by those of Pennsylvania, for s of the utmost importance to them to preserve. mean good markets. Without these, agricul ure can indeed exist, for, unlike all other human employments, it is self-supporting, l markets it cannot prosper and thourish. What, then, are the constituent ele ments of a good market for the farmer? I anwer, manufacturing, commerce and currency lu a State where timber, coal and iron ore are o abundant as in ours, and whose geographic position and internal improvements afford such facilities for obtaining raw materials which we do not possess, and for exporting the products cultural societies and schools, and these, the chief f our shops and factories, manufacturing is an chrique necessity. Were we the dullest people on earth we should be driven into it by force of our position and condition. We have not progressed in this form of industry as fast and as ar as our natural advantages would have justihed, but still our manufactories are name;

various and increasing. Philadelphia and Pite. burgh are, I believe, the most manufacturing towns on the continent. Around every bla furnace and rolling mill, every cotton or glass factory, every workshop and coal mine, the farmer finds consumers for his surplus. Production makes commerce. Until a people have produced more than will supply their own wants, there is nothing to sustain for, however, they may want their neighbors heve produced they cannot obtain it till they cave furnished themselves with the means of exchange. If the exchange is to be made in motey, that don't grow spentaneously, and must be btained from those who have it, by giving them some production which they want mere than money. But when agriculture and manufacturing have produced more than the producers consume Letween them is as unnatural as between memtabitants, disposed to be nospitative and generically supported by the left in ave no need of you, or the eye to the ear. I have no need of thee, as much cover, and when, with a woman's wit, the that agriculture, manufactures, and commerce hands say to the feet I have no need of you, or

> od for them these great interests are all necessar to the civilization and happiness of the race they must all flourish or decay together It scears to use then that when government un ertakes to bux one of these interest, and esp-| cially that one which is most functionental an mportant, for the benefit of others, it violate the order of tenture and perpetrates a great wrong

To taxation reasondly and justy imposed f 'ue necessary, support of government there can Such burthens are more than companying by the peace and good order which government maintains; and since agriculture pays directly large taxes to governa ent, and, by ampporting and other industry, enlarges continually the basis it taxation, bounties and appropriations out of the public treasury in aid of agriculture are for are common weal and quite justifiable. But all following with her feel public for the protection of one branch of ictaxation, bounties and appropriations out of logislation for the protection of one branch of lelustry at the expense of others; all interfe ance between the producer and consumer, with ite mand and supply, is as unnatural asi ', riinouto the farmer's markets. Let the 'rmer have the markets of the world-the mi dleman if he wants him-and the best price he at get for his productions. The magnetism of the plough, it unobstructed, will draw to it the loom and the of Mt. Airy, the esteemed President of this society is an infrastrious example, who take all boat and the rail car. Weights and measures

The subject of currency is too large to be fully treated in an occasional address like this. It is currency which measures the value of everyhing that labor produces, and regulates exchanges Of course its healthfulness is indiswashed down to fertilize the ditch of a turnpike pensable to the farmers' market. I remind you that the Constitution of the United States, under which it is our unspeakable privilege to live, gives to Congress representing the people in every district of the Union the exclusive power to coin currency reasonably pure, with its decimal value

Hitherto, Mr. President, my observations have

been addressed to farmers as a class. Before I close, I wish to leave a few thoughts on the minds of other classes mechanics, mer-Let our farmers add only, at small expense, a chants, capitalists, professional men-all men

wall that goes up from a famain soity; the din to fandantry as hashed sthool transfer they true, desert-Again, we want better breeds of horses and ed of their trongs, are desolate now, and twin spectres, Pamine and Pertilent. through the marts of trade and the mainless

The great city bath no sound nor

Behold a great army, as it marches on, conquer ing and to conquer, how terrible i sengines of destruction, how resistless its power, and yet let the farmer withhold his bread, and is bravest battallons, are as grasshoppers. What more than the titular dignit eries of the chies hoard were these embattled hosts lately us embled in the locks every year for the marke. But we have Crimen, except as the farmer fed them? Ay, it was the farmer, the instrumental Trovidence on earth who lent courage to their hearts and -are built on agriculture. No other foundation can man lay than that It is the art preservaments, it resembles nevertheless the work of creation-the grandest display of God's power, and deserves to rank among the sublimest achievments of human genius. To make two blades of grass grew where but one grew before, what is that but to mimic creative power? Yet such is the misjudgment of the world, we honor this, the only heaven appointed employse found at these fairs, or read the transactions | ment of man, the least of all others. Our sons of this and other Agricultural Societies recording the short fixed dignities of professional life, or for the excitements of trade and comnerce, and turn away from agriculture as from loathsome divigery. Even War, whose work a destruction, is accounted more honorable then he victories of the sword, whils: we disregard

those of the ploughshare; as if fighting were oan farming, and "The Kingdom be they are in the full enjoyment of it, but which it destroyed" a better prayer than "Thy Kingdom Friends and fellow-citizens: We should strive, each one in his appropriate sphere, to cuitivate a better sentiment, a sounder philosophy; to realize ourselves and to make others realize the leep stake we all have in agriculture. Let us remember day by day our daily bread. All are not to turn formers—that were to mar the fair proportions of society; but all can encourage the efforts which are made for the advancement of this great fundamental interest. In one way or mother every man can do something to aid agriagencies in agricultural reforms, will pour the norm of plenty all over the land, and pay back,

brough an improved husbandry, all they receiv and more-good measure, pressed down, and run aing over.

And when wants and deficiencies shall be all emedied - when our agriculture shall have enched that point of perfection that is perfectly racticable—when Lill and valley shall be spread aver with a yeomarry theroughly enlightened— when education shall become universal—and as cound morality, such as usually associates itself with the firm shall be diffused broughout ulf. asses-our land yielding its increase according its full capacity—our political institutions, it firm and strong to protect and bless our mulplied millions, we shall enjoy in all the realities a living experience that glorious vision of

if a living experience that generous states wrapt Minstrel—

"That our some should grow up as young plants,
That our daughters shruld be as cornerstones,
Polished after the similitude of a pulsace;
That our garners shruld be full, sheep should bring forth themand

And ten thousands it our streets; That our even should be strong to labor. And that there should be strong to labor. With all the unction of the Ensalmist we may
