## Buchanan, through his Secretary of State, structs Governor Walker in the following r

"When such Constitution should be submitted markable words: to the people of the Territory, they must be pro-tected in the exercise of their right of voting for

or against that instrument, and the fair expression of the popular will must not be interrupted by

fraud or violence." What are we to understand by the word "when." if not to show his opinion and desire that the Constitution should be submitted. But let us look to the answer made by Governor Walker to this instruction. Here it is :

"On one point the sentiment of the people is almost unanimous, that the Constitution must be submitted, for ratification or rejection, to a vote of the people, who shall be bona fide rest

dents of the Territory next fall." He is informed by Governor Walker there is

but one sentiment on the question of submission. Governor Walker, acting under the the instruction of the President, assures the people of Kansas that if the Constitution is not submitted, Congress will reject it. In his inaugural address

he says : --"With these views, well known to the Press dent and Cabinet, and approved BY THEM 4 . cepted the appointment of Governor of Kanaga My instructions from the President, through the Secretary of State, under date of the 30th Morch last, sustain the regular Legislature of the Tet: tory in assembling a Convention to form a Constitution. And they express the opinion of the President, that when such Constitution shall be submitted to the people of the Territory, they must be protected in their right of voting for er against that instrument, and the fair expression the popular will must not be interfered with by fraud or violence. I repeat, then, as my clear conviction, that unless the Convention submit h Constitution to a vote of all the actual resident set tlers of Kansas, and the election be fairly an i qui elly conducted, THE CONSTITUTION WILL BE. ANI

UUGHT TO BE, REJECTTD BY CONGRESS Had not the people of Kansas a right to be lieve that that the Constitution when frame would be submitted ? Suppose, sir, the Gov ernor of this State would assure the people he fore the election of delegates to reform or amenour Constitution, that such amendments would be submitted to the people for ratification or rejection, would not thousands stay at home, and refuse to leave their work and go and attend th election? They would wait, and if the ameudments did not sait them, they would vote them

down. What an uprising would there be among our turdy people if this was not done ! Gov Walker was appointed by President Bu chanau; he gave him his instructions; he knew

full well what he was doing in Kansas; he knew that he was assuring the people of that Territory that the Constitution should be submitted to them-and now, sir, why did he not recall Gov Walkerif he was not carrying out his views? There is a Latin moxim in law which will apply to this case-"facit per alium facit per su" He was the agent of the President, and his nots were the nots of the President ; for all his declarations an assurances to the people were well known to th National Administration, and the President an his Cabinet remain in perfect silence without d. avowing or refusing one of them. Then, I ask any gentlemen in this Convention, had not the people of Kansas a right to believe the assurance given them by Governor Walker

Our Lecompton friends urge that it was sul mitted. But how was it done ? By voting f the Constitution, whether it is right or wrot they could vote for or against slavery Wen you have voted, sir, for that Constitution of y "had been in Kansas ? I would not; and yet to vote was voting for it; for it allowed it to t carried by that minority. Under that Constitu tion the best and purest man could not be elect ed Governor, unless he hal served the Know Nothing time of probation If it had been in the
