LOCAL AFFAIRS.

Resuscitation after Drowning. A great number of persons have been drowned in the Monongahela and Allegheny rivers during the present summer. In one or two cases the bodies have taken out of the water soon afterwards, but we have taken out of a single in which life was restored after it was apparently extinct. Frequently, when the body, shows no sign of life, animation is only separaded, and by proper means may be restored. suspended, and by proper means may be restored. In the hope that the following rules, laid down by following :--the late Dr. Marshall Hall, may be the instrument of

except in severe weather. 2. To Clear the Throat—Place the patient gent'y on the face, with one wrist under the forehead; all fluids, and the tongue itself, then fall forward, leaving the entrance info the windpipe free. If there be breathing, wait and watch; if not, or if it fails 3. To Excite Respiration—Turn the patient well and instantly on his side, and excite the nostrils with time, officers Hague and Bradly returned to Chicago,

snuff, or the throat with a feather, etc., and dash cold water on the face, previously rubbed warm. If there water on the face, previously rubbed water. It there be no encess, loss not a moment, but instantly 4. To Initate Reprintion-Replace the patient on his face, raising and supporting the chest well on a folded encited encourse study of drass. Then the body who must be for him to escarse. Neither money nor pains will be spared to secure him, and the chinese are, that with the assistance of the Chicago police, who must be for him to escarse in the body nis tace, raising and supporting the cuese went on a folded ceat or other article of dress. Turn the body very gently on the side and a little beyond, and then speedly caught.

brishly on the face alternately repeating these mea-sures deliborately, efficiently, and persoveringly, fif-teep times in the minute, occasionly varying the side. Good Things .--- Col. Fricker, at Walnut Hall, Fifth street, is indefatigable in furnishing our citizens with When the pstient reposes on the chest, this cavity is compressed by the weight of the body, and expiratable luxuries, and is supplied with the earliest of the season. Green corn, ripe tomatces and water ion takes place : when he is turned on the side this melons are now on hand at his establishment. pressure is removed, and inspiration occurs.) When

Hunt & Miner have their usual supply of periodthe prone position is resumed, make equable, but ical literature for the week. Among others, we ch-serve the New York Picayane for this week, and efficient pressure, with brisk movement, along the back of the chest, removing it immediately before Nick Nax and Yankes Notions for August. rotation on the side. The first measure augments the expiration, the second commences inspiration

The result is respiration, and, if not too late, life. . To Induce Circulation and Warmth-Meantime rub the limbs upwards, with firm, grasping pressure, and with energy, using handkerchief, &c. By this measure, the blood is propelled along the voins to-wards the heart. Let the limbs be thus warmed and dried and then clothed, the bystandars supplying the requisits garments. Avoid the continuous

warm bath, and the position on or inclined to the back. This treatmost is to be persevered in for three or four hours, as it is the erroneous opinion that persons are irrecoverable, because life does not the notice of the Royal Humane Society of successful results oven after five hours.

The Cricket Match. Owing to several errors having found their way into our' report of the cricket match, between the Union Club, of Cincinna'i, and the Olympic Club, of Pittsburgh, played at Oakland, on Thurs-day and Friday of last week, we give a correct score and analysis of the bowling, which can be depended upon for its accuracy. We are informed that no re-port of the match yet published has been strictly correct, which, if not considered as of much im-portance by the public generally, is a different matter as regards the oricketers :---

In their operation as a cathartic, they influence more the motory and less the scenning power of the bowels than any other combination in common use.
 AS A TONIC-They agree with the most delicate stomach, removing naneae, pain, and debility from that organ, and through it impart tone and vigor to the whole system. As AN ANTI-DYSPEPTIC-They neutralize and interrupt the formation of gases from the food in the stomach, -the direct consequences of chemical action, -an action which should never exist in the human stomach. From these peculiarities in the Pills, a person taking them may expect a free, full and natural evacuation of the bowels, without pain, nanese, local or general debility, or that disgrating sickness or costfweness-the usual effects which attend or follow the use of other purges.
