

Gold Mining in New California.

If the intelligence from the recently discovered gold mines of Fraser's and Thompson's rivers is authentic, and we know of no reason for doubting it, there are large deposits of the precious metal in those localities, although but little of it has yet reached San Francisco.

The Washington Union accounts for this by the fact that the Hudson's Bay Company, exercising an exclusive control over the trade of that section of British North America, are the only buyers of gold and sellers of provisions, and consequently the gold passes directly into their hands in exchange for supplies.

The discovery of gold has occasioned an immense speculation in property at Victoria, Whistler, and other points. At Victoria a great excitement prevailed in relation to real estate, which was advancing very rapidly.

Lots 60 feet by 120 feet were selling from \$100 to \$3,000. All the best property has been taken up. The land office was open the day the news of the discovery was made.

The Union publishes the instructions of the English Government to Gov. Douglas received by the last mail from Europe, which show that Americans and other foreigners should not be excluded from the gold fields.

The monopoly of trade exercised by the Hudson's Bay Company bears oppressively upon the English settlers as the foreign miners, and will quickly yield to the more liberal views which must follow this wonderful and sudden increase of population.

It appears that he has received with his wife income \$400 per annum, and was most welcome to him and his family. He had come to the United States in 1854, and had been refused to allow Lady Lytton more than the sum above named and that he had thereafter an eight years' residence in the United States.

It is with the most profound feelings of sorrow that we record the death of Major John Sanders, of the United States Army, who died suddenly on Thursday, the 29th inst., at the Pen Patch, on the Delaware.

He was by birth a Kentuckian, graduated with distinguished honor at the West Point Military Academy, where he excelled in mathematics and civil engineering, and immediately after finishing his preparatory course he entered the army in the engineer corps.
