DEMOCRATIC STATE NOMINATIONS. FOR SUPREME JUDGE,

WILLIAM A. PORTER, OF PHILADELPHIA. FOR CANAL COMMISSIONER,

WESTLEY FROST, OF FAYETTE COUNTY.

DECLINE OF KNOW-NOTHINGISM. After all, although sometimes temporarily carried away by their prejudices and their feelings, the masses of the people in this country are averse to everything which they discover to be morally, socially, or politically wrong. A good evidence that the American heart is in the right place, is to be found in the history of the rise and fall of the so call. ed American party in this country. Many sensible men were at the outstart of the party deceived by the speciousness of its doctrines, and unaware of the knavery of many of the leaders, they joined the dark lantern order, believing that its general objects were | we publish this week will show that the Inright. But all these examples of finally her own destruction? lawlessness and misrule, bloody in their results as many of them have been, have had the good effect to open the eyes of all the honest, though misled men, who at first were attracted to the vile organization. They have seen its effects, and from these they correctly judge that the cause is a bad one—that its ends and aims are inconsonant with the true principles of American liberty. In the result of the recent elections in Louisville and Saint Louis, the popular distaste of the principles of so-called Americanism, is clearly. manifested. Throughout Kentucky, the machinations of the dark lantern gentry have signally failed. In Pennsylvania, Bucher Swope, leads but a powerless corporal's guard of plug uglies. The people are not accustomed to be deceived twice, and as a distinctive party, Americanism can never again raise its head. The National Democracy is only the true American party. Its organization is no sectional opposition can successfully oppose its onward course.

## The Completion of the Pittsburgh, Fort Wayne and Chicago Railroad --- Public

Spirit in Chicago. The early completion of the Fort Wayne Road to Chicago has been already announced. In that city the people look upon this noble enterprise as one of unequalled magnitude of interest to their city. They have assumed the novel feature of occupying a stand-point in regard to railroad enterprises precisely the antipodes of that which is too customary, when citizens array themselves against railroads in their progress through a thronged city, as aggressors and invaders, instead of benefactors.

It seems that the question has been settled that there are to be two, and only two, great union railroad depots in Chicago, and the be located as a fitting rival to the splendid lake | instead of doing it themselves. Their decis- | lecting a site for a public building in that city,

It is of the most liberal character, and will undoubtedly be adopted, if we may judge from the public expression of opinion as given at the meeting.

Before concluding, we may mention incidentally, that the prospects of the Pittsburgh Fort Wayne and Chicago Company are daily improving. Arrangements have been made so that the necessary amount for promptly paying the running expresses of the road, will be set apart from the receipts, and with'n thirty days at most, the pay rolls to the first of August will be met. The floating debt is being gradually diminished, and the remaining home debts will be speedily arranged, while business is such that no necessity exists to contract new ones. When the line shall have been completed, which it will now be, in the course of a few weeks, the through business upon a continuous route, uninterrupted, even by a ferry, from Philadelphia to Chicago, must be very large, and the receipts therefrom, will soon relieve the Company from all financial embarrassments of a temporary character caused by the crisis last year. No Railroad in the country has more brilliant prospects than the Pittsburgh, Fort Wayne and Chicago, at the present time.

CARD FROM DR. JAMES M. JAR-RETT, OF THE NEW YORK LUNG INFIBM ARY.—My connection for the past eight years with the above Institution, as Chief Physician, and a twelve years course of steady devotion to the cure of Pulmonar, Consumption and its kindred diseases, together with my unrivalled opportunities and advantage of pathological research—aided not a little by a perfect system of Medical Inhalation—has enabled me to agrive at a decisive, direct and successful converse of treatment for the positive and radical cure besaful course of treatment for the positive and radical cure of all diseases of the Throat, Lungs, and Air-Pattages. By Inhalation, the vapor and curutive properties of medicines of all diseases of the Throat, Lungs, and Air-Passages. By Inhalation, the vapor and curative properties of medicines are directly adressed to the diseased organs and the integrament. I do not advise the use of Medical Inhalation of any kind, to the exclusion of general treatment, and although I consider it a useful adjuvant in the proper management of those fearful and often fatal diseases, yet I deem it very necessary that each patient should have the benefit of both governal and local treatment. The success of my treatment in the above diseases, and the high character of the Institution over which I have so long had the honor to preside, are goneral and notes treatment. In success, my treatment in the above diseases, and the high character of the Institution over which I have so long had the honor to preside, are too well known to need any enlogy or comment from me. At the solicitation of many private and professional friends, through whose philauthropic aid the above charity has been long and liberally supported, and sizer due consideration, I have concluded to make such arrongements as will bring the benefits of my experiments and treatment within the reach of all, and not confine myself, as heretofore, to those only who enteed the Indirmary, or who were able to visit me at my office. Hoping therefore that the arrangement will give entire satisfaction, both to my professional brettern and the public, I would respectfully announce in conclusion, that I can now be consulted personally or by letter, on all diseases as above, and that the medicines, the same as used in the Institution, prepared to suit each individual case. Inhaling Vapors, Medical Inhalert, &c., &c., will be forwarded by express to cap part of the United States or the Canadas. Tenus—My terms of treatment by letter are as follows, viz: \$12 per month for each patient which will include medicine sufficient for one month's use; also, Inhaling Vapor, and an inhaling Apparatus. Payment as follows: \$6 to be paid to Express Agent on receipt of the box of Medicine, and the balance \$6 at the expiration of the month, if the pati nt be cured or is entirely satisfied with the treatment. Patients, by giving a full history of their case, and their symptoms in full, can be treated as well by letter as by personal examination. Patients availing themselves of Dr. Jarre't's treatment may rely upon immediate an I permanent relief, as he seldom has to treat a case over their of the formal case over the results and series.
