## FOR CARAL COMMISSIONER, WESTLEY FROST,

It is very probable that nine tenths of our readers had concluded some weeks ago, that the right of search and visit, as practiced un- on the 16th of August next, at four dollars per der British orders by the Styx and Buzzard, ticket and other "wessels of wrath" with unclean names, in the Gulf, had been definitely set- given notice of his intention to enter himself as tled. Nothing could be farther from the fact, and the last news from England is most interesting on this point, and must leave every body in the wildest conjecture as to the motives on both sides, which has brought the affair to such a lame conclusion after Lord Napier's prompt silencing of his naval armament in the Gulf, and the peremptory pluck of our squadron in hastening to the scene to

see into it. It is evident that Lord Napier has been a little too fast and in advance of his instructions when he stopped operations on the Cuban coast, and our Minister at London has promised too much as a consideration for the price of a very equivocal and temporary

Cuba was roughly handled in debate by these gentlemen, and it was more than insinu. ated that the Governors of that gem of the sea, for a number of years, Messrs. Valdez, Roncales, Concha, &c., had been no better than false knaves, and that the present policy was a complete failure.

The opposition, Messrs. Palmerston, Buxton and D'Israeli, turned all their argument of the commercial and peace party into ridicule and laughter, and in the debate of the 12th denounced any change of policy in the right of search, and they succeeded for on

The same paper is delighted with the renomination of John Covode, although the editor remarks, more "brilliant men than Mr. Covode may be found in the House of Representatives." This is possible, and would apply with equal force to Mr. Purviance. The North American need not be troubled about the succession, the Democracy will take care of that. Mr. Covode will be defeated just as certain as he lives, by Hon. Henry D. Foster, whilst the opposition in the Twenty-first and Twenty-second Districts stand not the ghost of a chance.

A Stockholm correscondent states in relation to the young lady : " Every one knows young Henriette. She is eighteen years old, fair hair, of elegant person, and has eyes of deep blue and of a poetical expression. She excels as a writer in prose as well as of verse, and nothing can exceed the grace and beauty of her appearance. Before the slander to which we refer poisoned her exiss the Sub-Atlantic Telegraph. Although it tence, she was noted for her animation and

cheerfulness, and was passionately fond of amusement especially dancing. Her dencing was admirable, her manner bewitching, and the charm to her conversation. In one word, she was the flower of the land, and when the news of the slander upon her spread about, she became the object of universal sympathy, the whole edium of it falling upon the detractor." When the day of his execution arrived, (July 2, 1858.) this gentleman seemed composed and said: " I am going to suffer the penalty of death, which I deserve; however, it shall soon be made evident that, at all events, I was not a coward.'

He then gave some of the papers which were on his table to the Jailor, giving him some private instruction about them; and having taken a letter sealed with black from the Bible and concealed it in his breast, he proceeded with unfaltering steps to the scaffold which was prepared for him. The Oldest Bible on the Continent-A Book over 200 Years old. This is a volume of six hundred pages, says he Detroit Free Press, containing the whole Bible in the Latin language. It belongs to the Rev. Dr. Duffield, of this city. The book is made entirely of vellum, and the printing is all done by hand with a pen and ink. Every letter s perfect in its shape, and cannot be distinguished, by any imperfections in form, from the printed letters of the present day. The shape of the letters is of course different from those now in use, from printed matter. The letter is about the same size as that in which this article is printed, which will give an idea of the difficulty of forming so perfect a work. The immense amount of labor may be conceived from the fact that there are two columns on each page, each of which lacks only about six letters of being as wide as the columns of this paper. They will average sixty lines to the column. The columns numbering 1,200, we have about 72,000 lines in the whole book. Nothing short of a lifetime could accomplish such a work. The date of this book is A. D. 930. It was consequently made 560 years before printing was invented, and is 928 age. The vellum upon which it is printed is of the finest kind, and is made of the skin of young lambs and kids, dressed and rubbed with pumice stone until it is very thin. It s somewhat thicker than common paper, being a medium between that and the drawing paper now in use. The fine veins in the skin are distinctly visible in many places. A pencil mark was drawn by the operator to guide the construction of each line. Many pages have these lines visible on their whole surface. no effort having been made to rub them out. Exclusive privileges for fifty years of landing Two lines running up and down divide the col cables on Newfoundland, Labrador, and their umns with mathematical accuracy. At the beginning of each chapter, highly colored ornamental letters are placed. These are the only marks of the division of chapters. There are no subdivision into verses, the chapter running through in one paragraph to the end, and no

discriptive headings. This invaluable relic was presented to Dr. Duffield by Lewis Cass, Jr., our minister resident at Rome. He procured it of a German monk, who brought it from the Greek Sinai. Mr. Cass befriended this monk, who was in trouble, and he in return presented him cording to his story, it is the work of one of the ancient monk scribes in the convent above.

The Atlantic Telegraph. NEW YORK, Aug. 9, -The recording instruments for the Atlantic cable are on such a state f forwardness as to insure the early opening of the line for business. It is understood that the transmission of the Queen's and the President's nessages thro' the cable will take place early in the afternoon, and probably in the course of the present week. Instantly after the transmission f the President's reply to the Queen's message. the two communications will, by consent of the President, and the co-operation of the managers and employees of the telegraph lines of the ountry, be made public from Newfoundland to Texas, and from Quebec to the boundary of civilzation in the Northwest. We have assurances from all points that so soon as the Queen's and the President's messages are received, there will be public and private demonstrations of joy by the ringing of bells, firing of salutes, &c., &c., n every city, town and village throughout the whole country. It is understood that Wm. Field will cause notice to be given, in advance, of the day when the first message will be transmitted through the cable.

From St. Louis. St. Louis, August 9.—Gov. Powell and Major M'Cullough, the Utah Peace Commissioners, arrived last night, and proceeded east in the early train this morning. Mr. Cronin arrived las night, in twenty-eight days from Albuquerque, reporting 375 mounted men thoroughly armed on Pawnee Fork of Arkansas river, en route to assist Gen. Walker in Sonora, at El Paso. Mr. Crosin learned that Gen. Walker passed through there a short time previous with 800 mounted men, armed with Minnie rifles, Colt's revolvers Indians on Pawnee Fork, receiving annuities from Col. Burt. A despatch from Independence, dated the 6th, says that the Santa Fe mail, with dates to the

19th ult, arrived there. The news is unimportant. The mail party reports that the Indians were very troublesome on the route, stopping the trains and demanding provisions and whisky The rivers continued high and the weather wet In some places the roads were washed to such an extent as to render it very difficult for the trains o proceed. Very heavy rains fell in Santa Fe before the mail left. The Atlantic Telegraph in New York-Hospitalities of the City Tendered. Age and Debility. As old age comes creeping on, it brings many attendant infirmatics. Loss of appetite and weakness impair the health, and want of activity makes the mind discontended and unhappy. In cases where old ago adds its influence, it is almost impossible to add vigor and health, and although many remedies have been tried, all have failed, until BERHAVE'S HOLLAND BITTERS were known and used. In every case where they have been employed they have invariably given strength and restored the and Fishi appetite. They have become a great agent for this sortment years old. There is probably nothing on this continent in the shape of a book equal to it in ing from loss of appetite and general debility. In age. The vellum upon which it is printed is of cases of long standing chronic diseases, they act as a charm, invigorating the system, thus giving nature another opportunity to repair physical injuries. F. W. JENKINS, Pittsburgh, Pennsylv CARD FROM DR. JAMES M. JAR-

A CARD FRUM DR. JAMES LUNG INSIRM
RETT, OF THE NEW YORK LUNG INSIRM ARY.—My connection for the past eight years with the above Institution, as Chief Physician, and a twelve years' course of steady devotion to the Cure of Pulmonary Computed and its kindred diseases, together with my unvalled opportunities and advantage of pathological research rivalled opportunities and advantage of pathological research—aided not a little by a perfect system of Medical Inhala-tion—has enabled me to sarive at a declaive, direct and suc-cessful course of treatment for the positive and radical cure of all direcses of the Throat, Lungs, and Air-Passages. By Inhalation, the vapor and curative properties of medicine are directly adressed to the discussed organs and the integreent I do not advise the use of Medical Inhalation of an ment. I do not advise the use of Medical Inhalation of any kind, to the exclusion of general treatment; and although I consider it a useful adjuvant in the proper management of those fearful and often fatal diseases, yet I deem it very necessary that each patient should have the benefit of both gaveral and local treatment. The success of my treatment in the above diseases, and the high character of the Institution over which I have so long had the shourt to preside, are too well known to need any culcgy or comment from me. At the solicitation of many private and professional friends, through whose philianthropic aid the above charity has been through whose philanthropic aid the above charity has been long and liberally supported, and after due consideration, I have concluded to make such arrangements as will bring the benefits of my experiments and treatment within the reach of all, and not confine myself, as heretofore, to those only who entered the Infirmary, or who were able to visit me at my office. Hoping therefore that the arrangement will give entire satisfaction, both to my protessional bretheren and the public, I would respectfully announce in conclusion, that I can now be consulted personally or by letter, on all diseases as above, and that the modicines, the same as used in the Institution, prepared to suit each individual case. Inhaling Vapors, Medical Inhalers, dc., dc., will be forwarded by express to any part of the United States or the Oanadas. Isans—My terms of treatment by letter are as follows, viz. \$12 per month for each patient which will include medicine sufficient for one month's use; also, In gh whose philanthropic aid the above charity has been

of Medicine, and the balance \$0 at the expiration of the month, if the pati at be cared or is entirely satisfied with the treatment. Patients, by giving a full history of their case, and their symptems in full, can be treated as well by letter as by p'rsonal examination. Patients availing them selves of Dr. Jarre'ts treatment may rely upon immediate an I permanent relief, as he seldom has to treat a case over thirty days. Letters for advice promptly answered. For further particulars, address
