NAVY DEPARTMENT, July 26, 1858. CEALED PROPOSALS, endorsed "Propo salt for Steam Machinery for Screw Propeller Shaps, of War," will be received at this department until 3 o'clock P. M. of the 5th of September next, for the complete construction of the seam machinery and appendages, and placing the same on occur. For each of the screw shoon-of-war ilding at the U.F. navy-yards at cortsmouth, N. H., New York, Philadelphia, and Gosport in accordance with the folwing conditions: The offers must be for a specific sum for putting the whole n successful operation, must include all patent fees, and the epartment will require a release from the proprietors of any patented article or arrangements used in or about the suchinery, and must state the time in which the work will completed, and must be accompanied by the usual guar-The name of the establishment in which the work is be executed must be stated. The details of the design and arrangement of the machinery will be left with the party where proposition may be excepted as combining the greatest number of advantages, keeping in view cost, simplicity of construction, readiness of access for adjustment when in operation, and not being subject to derangement in the working parts; it leng the object of the cepartment to procure machinery which can develop great power when required so as to insure high speed for as many days as possible, while at the same time they will be able to propel the vessel at a moderate speed with great economy of fuel, to that long voyages may be performed with one supply of coal.

to guaranty the results proposed to be accomplished by their plans, and to specify those results under the following their plans, and to specify those results under the following heads:

1st. The amount of horse power which the sugines and boilers will be able to develop for five days consecutively when driven up to their highest capacity to be measured on board the vessel by the indicator, at the rate of 33,000 pounds lifted one foot high in a minute and to be not less than 1000 horse power, and at least 80 revolutions per minute.

The consumption of coals per horse power per hoar must be started. The pressure in pounds per grans reined on the phiston necessary to work the engines at the above velocity, the screw being disconnected and the outlines without a load, except the fine of shatting, must not exceed 2½ pounds per square inch of pitch by indicator diagram.

2d. The quantity of c all which can be stowed in the ship withent exceeding the total weight of 406 tons for machinery, sppandages, bothers and water in them, bunkers, tools, square pieces, and coal within the length occupied by the engines and boilers. The bollers to be of iron of the multitubular kind, with brass tubes and with telescopic smoke pipe, and, as it is intended to use fresh water in the beiters, a surface condenser of the most approved kind will be required.

The remailer with the connexional for heighting it will be required.

revolutions per minuto and for the immersed amidship scotion of the vessel.

The pumps, apparatus for ventilating, and appurtenance s of all kinds necessary for the perfect working of the whole to be of the most approved kinds.

The ocal bunkers, shaft passage, two atwartship iron bulk heads, a distilling apparatus for fresh water, from which can be made not less than 500 gallous per day, and the tools and duplicate pieces necessary and astisfactory for an efficient cruicing steam sloop-of-war, must be included in the proposition, and a list of them will be furnished.

The wood and carpenter work, except the boring out the deadwood for the shaft necessary to adapt the vessel for the reception of the machinery, boilers and appendage will be provided at the expense of the Navy Department, and it will permit the use of such facilities as it may have for hoisting the hea y m schinery on board.

For the accommodation of the entire steam machinery and facilities as passe under the spar dock commencing at 16 feet abaft the main mast, and thence extending torward a distance of 50 feet. or 50 feet. Within this space it is expected to carry coal for five days' steaming at the maximum speed.

In the specifications the daily consumption of fuel will be trated; also the weight of the manhinery, coal, boilers, water in them, shaft, propellor and appendages, with tools and spare work, all of which must not exceed 406 tons of 2.2.40 pounds. The proposal must be accompanied by full specifications and general drawings, having the position of the centre of gravity of the machinery, boilers, &c., marked on them, giving also the capacity of the steam cylinders, pressure of steam, area of foot and delivery valves, and of air pump and ontboard delivery valves, and of air pump and ontboard delivery valves, space for steam above the water line of the boilers, the fire and grate farnace, also the diameter, pitch, surface, and kind or propeiler and other principal points, that comparisons can readily be made.

The terms of payment will be that, when one-half of the materials and labor provided for in the contract shall have been completed to the satisfaction of the department, there will be made a rayment of ½ part of the whole amount of the contract. When the whole thall have been completed and ready for erection in the ship a further payment of ½; and when the shipshall have performed satisfactorily at sea for a period of three months, the remaining sum shall be paid. The repairs necessary during this period from dofective workmanship or materials will be at the expense of the contractor.

It is to be understood that if the weight and other conditions specified in the contract be not complied with, the department is to be still be a still be paid.
