Age and Debility. As old age comes creeping on, it brings many atendant infirmaties. Loss of appetite and weakness impair the health, and want of activity makes the mind discontended and unhappy. In cases where old age adds its influence, it is almost impossible to

add vigor and health, and although many remedies have been tried, all have failed, until BERRAVE'S HOLLAND BITTERS were known and used. In every case where they have been employed they have invariably given strength and restored the appetite. They have become a great agent for this alone, and are used by many people who are suffering from loss of appetite and general debility. In cases of long standing chronic diseases, they act as a charm, invigorating the system, thus giving nature another opportunity to repair physical injuries.
