The offers must be for a specific sum for putting the whole Maysville, Ky. Madison, Ind lowing conditions:

The offers must be for a specific sum for putting the whole in successful operation, must include all patent fees, and the department will require a release from the proprietors of any patented article or arrangements used in or about the machinery, and must estate the time in which the work will be completed, and must be accompanied by the usual guarantee required by its.

The name of the establishment in which the work is be recented must be stated. The details of the design and arrangements must be wrated. The details of the design and arrangements must be wrated. A. L. WEBB & BRO. (Successors to Elber & Were,) The name of the establishment in which the work is be executed must be stated. The details of the design and arrangement of the machinery will be left with the party whose proposition may be excepted as combining the greatest number of advantages, keeping in view cost, simplicity of construction, readiness of access for adjustment when in operation, and not being subject to derangement in the working parts; it being the object of the department to procure machinery which can develop great power when required so as to insure high speed for as many days as possitie, while at the same time they will be able to propel the vessel at a moderate speed with great combiny of faci, rothal long voyages may be performed with one supply of cost. GENERAL COMMISSION MERCHANTS Geo. W. Smith & Co.,
W. H. Garrard,

May a distribution of the control of the contro vessel at a moderate speed with great economy of face, for the long voyages may be performed with one supply of coal.

With this view, the department will expect the bidders to guaranty the results proposed to be accomplished by their plans, and to specify those results under the following needs:

1st. The amount of horse power which the engines and believe will be able to develop for five days consecutively when driven up to their highest capacity, to be measured on board the vessel by the Indicator, at the rate of \$3,000 pounds lifted one foot high in a minute and to be not less than 1000 horse power, and at least 80 revolutions per minute.

The consumption of coals per horse power per hour must be stated. The pressure in pounds per square inch on the piston necessary to work the engines at the above velocity, the screw being disconnected and the engines without a load, except the line of shatfing, must not exceed 1/2 pounds per square inch of piston by indicator diagram.

2d. The quantity of coal which can be stowed in the ship without exceeding the total weight of 403 tons for machinery, appendages, poliers and water in them, bunkers, tools, aquare pieces, and coal within the length eccupied by the engines and boilers. The boilers to be of fron of the multitubular kind, with brass ubes and with telescopic smoke pipe, and, as it is intended to use fresh water in the boilers, a surface condenser of the most approved kind will be required.

The propeller with the connexions for hoisting it will be FENRY H. COLLINS, Forwarding and E. Commission Merchant, and wholesale dealer in FIRH, SHEED; and PRODUCE generally, No. 25 Wood street, Pittsburgh. mark ALFRED E. CURLING MORGAN EDREATSON.

revolutions per minute and for the immersed amidship section of the vessel.

The pumps, apparatus for ventilating, and appurtenances of all kinds necessary for the perfect working of the whole to be of the most approved kinds.

The coal bunkers, anhtt passage, two atwartship iron bulk heads, a distilling apparatus for fresh water, from which can be made not less than 500 gallons per day, and the tools and duplicate pieces necessary and satisfactory for an efficient crinising steam sloop-of-war, must be included in the proposition, and a list of them will be farnished.

The wood and carpenter work, except the boring out the deadwood for the shaft necessary to adapt the vased for the reception of the machinery, boliers and appendage will be provided at the expense of the Navy Department, and it will permit the use of such facilities as it may have for lossing the heavy m-chinery en board.

For the accommodation of the entire steam machinery and fuel there will be allowed in the body of the ship, the entire space under the spar deck commencing at 16 feet abaft the main mast, and thence extending forward a distance of 50 feet.

Within this space it is expected to carry coal for five days' steaming at the maximum speed.

In the specifications the daily consumption of fuel will be stated; also the weight of the machinery, coal, boilers, water in them, sheft, propellor and appendages, with tools

PROF. C. J. WOOD—Dear Sir. I have used two bottles of
Professor Wood's Eair Restorative, and can truly say it is
the greatest discovery of the age for restoring and changing
the Hair. Before using it I was a man of seventy. My
Hair has now attained its original color. You can recommend it to the world without the least fear, as my case was
one of the worst kind. Yours Respectfully.
