A MODIFICATION OF THE TARIFF. Heretofore we have taken occasion, through the columns of the Post, to urge upon the attention of the Democratic Senators and Representatives in Congress from Pennsylvania, the vital importance to the people of the State of more protection for her products and manufactures, and especially for the iron interest. We have shown that Pennsylvania is the greatest iron producing State in the Union-that her coal beds are inexhaustible, and that she possesses within the bosom of her own soil, elements of wealth, which are unrivalled by any country in the world. We have shown the beneficial results to American industry of every description-agricultural, mechanical, and commercial, which the rapid and economical development of the nat ural resources of our State would produce. and we have also shown that the paralysis, which at present exists in almost every branch of manufacturing business, and especially among the producers and manufacturers of iron, is the result of the uncertainty that the Susiness will prove remunerative, owing to the fact that the cheap labor of Europe is permitted to come so nearly in direct competition with the free labor of America. In the articles upon this subject which have already appeared in our columns, we think we have shown conclusively that the interests of Pennsylvania labor are not properly protested under the present tariff, and that the present plethora of capital in the country tures, and furnish abundant and well paid changed hands. Under the charge of H. employment for all classes, if there were a reasonable certainty that, besides paying labor and first cost of materials, a fair profit for the investment could continue to be realized. Give, for instance, a prospect of per manency to the iron business, and much of the capital, which is now lying idle in the hands of men who do not wish to run unusual or unnecessary risks would at once seek investment in the iron and coal regions of

prosperous is a restoration of confidence. The Democratic party has always been opposed to high tariffs for protection only;— a second attack of paralysis. their doctrine is a Tariff for revenue, with discriminations for protection where protection is most needed. It is now, we presume, an admitted fact, that the wants of the government will require an addition to the public revenue to meet its necessary expenses, and to repay loans which the public service has required, and the people look to the present Democratic Administration and the present Democratic Congress for a revision of the Tariff, and when this shall be done, Pennsylvania, as the greatest iron producing State in the Union, will be entitled to such discriminations in her favor, as will enable her iron men to compete with foreign manufacturers, and by developing the hidden wealth of her mountains and her valleys, make the farmer, the mechanic, the merchant and the laborer

Underground Telegraph to California. We learn from the Cleveland Plain Dealer that Messrs. O'Reily, Speed and others, are perfecting a sort of narrow prairie plow, with which to lay an underground cable through the western prairies to California. The plow s to cut a channel, say, three inches wide and three feet deep, so constructed as to pay out from the immediate heel of the plow, the insulated wire which will be in no way connected with the plow, other than passing down through it as it progresses. It is expected that on common prairie, this plow may be driven from ten to fifteen miles per day, filling in and covering the wire as it goes. The perfection arrived at in isolating wire with gutta-percha, is very great: the machinery is so perfect and condensed as to add much to

What I have to say will not cally define my own position, but also that of the entire list of protestants, no inconsiderable number of whom are and the occasional lifting of a scalp on either zealously laboring for the Anti-Lecompton principles of the Cincinnati platform. A few years ago, I signed petitions asking the County Commissioners to issue their bonds in favor of certain railroad companies for the purpose of

speedily completing the several roads leading into the county, and which were, in my humble opinion, ossential to the commercial and manufacturing interests of the city of Pittsburgh. These same peti-tions were signed by thousands of our citizens, and so wise a thing. Since the issue of the bonds, a party has sprung

into being doubting its constitutionality, and many members of that party are now seriously entertaining -Somebody, who wishes the present age to ment prevails with many who were the most earnest presperity, and his patriotic desire to see the grand idea of a rangous the Atlanto county government, interferes with individual rights every State prosperous where it can be done from Europe to America. If frauds have been committed by the railroad companies in obtaining corporate as it would individual dealers when the proofs practical genius should ever accomplish it, the fraud are presented; but when bonds have been issued originator of the idea would no doubt claim all in good faith in pursuance of law and without fraud, it would be merally wrong in us at this late day to repudiate, even if the courts should decide that they hands of their opponents, who always do its labors, it might leave the accomplishment of are not binding. Surely no one, whose petitions were effective in procuring these subscriptions, can this work to the succeeding generation, without honestly entertain adverse sontiments. This bond issue was the only question submitted

to the people by the Convention, and it to the exclusion of all subjects affecting our National and State It is alleged that the signers of the protest favor in endorsement of the Administration Lansas policy. The protest means no such thing, and the author of it, knowing the feeting of the people on this Calhoun swindle, very earefully framed his work so that Anti-Lecompton Democrats could stand on it without comsing their cherished principles. The author dorsed the Lecompton Constitution had it given expression to its well-known opinions, but would have reiterated the doctrines of the Cincinnati Convention, lauded, perhaps, the foreign policy of the Ad-

ministration, and renounced its prescriptive feature in relation to the friends of Senator Douglas.— This, or a direct endorsement of the Administration, should have been the fearless action of a Democratic Convention. But a few dollars and cents supplanted the greatest question of the day, and a ticket was nominated upon no other issue than Allogheny couny repudiation of debts honestly contracted.

The Convention "resolved, for the present, forego the consideration of National and State poliand presented Mr. Burke as the candidate to represent this district in the next Congress. It is throughout the State. In Penobscot, Cumberapparent to every man that the nominee is a gentleman of marked ability, who battled manfully for the Democratic ticket in 1856. The Democratic party will not abide by the decisions of the Convention, and Mr. Burke cunnot expect Democrats to rote for him on national issues when he "foregoes their considera-

The question of popular sove-reignly and the admission of Kaneas into the Union will be before the next Congress and the Anti Le-compton wing of the Democratic party will not suf-for itself to be betrayed into the support of an antitax-bubble candidate for Congress bacause a Convenion of faithless Democrate have supplanted the time For myself, I am opposed to this proceeding, and can only give my humble support to candidates both true and tried national Democrate, were among the first to identify themselves with the Opposition. A DEMOCRAT. | For the Morning Post. | FRIEND BARR :- I see the Democracy of this city and county are in a very deranged state just now. It nay be hoped, however, that a judicious and concilintory course of action may soon settle the efferves cence and restore harmony.

The question which seems to be the primary cause of the prosent derangement of our party organization is, that local question should not tend to disor

ganize the party.

It seems the Supreme Court of the State were divided regarding the legal validity of certain city and county bonds, that were issued by sity and county authorities. It seems that a majority of the mem-bers of the Supreme Bonch decided in favor of the validity of those bonds. Two of the members of the Supreme Bonch, with a

large number of citizens, now, it would seem, hold the opinion that those bonds are, and should be, legally decided to be invalid. On Tuesday afternoon, September 14th instant, HENRY BARKER, after a lingering illness, in the 59th year of Many citizens seem to hold the opinion that the decision of the three members of the Supreme Bench was correct, and should be sustained. There seems to be no political heresy that strikes at any principle of the National Democracy by vig-

orous action of either party in this local controversy The disgraceful and extremely injudicious conduct of a majority of the Democratic Convention in their refusal to identify any of their proceedings with the National Democracy, and their outrageous conduct n showing disrespect to some of our oldest, most listinguished and most meritorious leading Democrats, was deeply homiliating; but with all that, this excited selected Democratic Convention, with all their indiscretion, selected some good, sound, reliabl Damocrats, who can, and it may be hoped will, be supported by all good Democrats, and from their well known competency and honesty will be sus-tained by many voters who are opposed to their political proclivities. The Democracy should, under all circumstances, stand firm to principles, and guard with strict censorship the tenets of their po

faith, regardless of consequences.

The Democracy must be the same at all points o roducers. It is a happy time for the slaves.

Besides these products they are privileged, in the country. Therefore, even a certainty of defeat at any one or any number of points, should not intimidate any honest Democrat, or induce him to abandon any one principle of his national political faith, nor even endanger it by collusion with any a well regulated place everything betokens comto the Democracy, especially, when it was obvious that the Democratic Convention was more "Anti-

33 The main secret of preserving fruit in a frosh condition, consists in having it thoroughly heated when sealed
up, and in expelling all the air there may may be in the
vessel, so that when the fruit cock, it will form a vacuum.
The undersigned having precured the right to manufacture these Jars, respectfully call the attention of dealers
and others to them.
The great superiority of Glass over any other substance
for the preservation of fruits, etc., etc. is so well known,
that any comments upon it are entirely unnecessary, and
the proprietors feel confident that any one, after having
once seen these Jars, will never be induced to use any other.
