

REMEDY

For the Difficulty of Hearing.

DR. D. GREEN.

TAKES this method of letting society know that he has discovered a new and easy way of assisting those who are *hard of hearing*, quite a new way.

Knowing that Providence has permitted a remedy to grow for every disease he has made it his study, this number of years past, to try to find out this remedy.

At length he flatters himself of being successful, more so than any man yet.

The remedy generally gives help except to very old people, who began to lose their eye-sight about the time that the hearing becomes weakened. To all others it as yet, has seldom failed of restoring that great blessing of hearing.

Directions can be sent to the patient by post or other ways, to any place however distant. At the same time, it may be some-what satisfactory to those distressed to know that they may pursue their usual business, and to eat and drink what tastes best.

The preparing transmission, &c. of the remedy, will come to about five dollars.

One great object is to defuse its benefits as far as possible, therefore, all printers who will give the above an occasional insertion, shall receive its advantages for themselves, or relatives in thus assisting to place it within the reach of the distressed.

Mr. Editor,

Many people in letters to me, express a wish to have the principle of cure explained to them. This I cheerfully will do.

Principle of cure is to invigorate the whole system, for

"Whatever has a tendency to strengthen the whole nervous system, necessarily will strengthen any weak part.

Dr. Rush's Lectures.

This doctrine we have been taught in his lecture room—and on this doctrine my method of cure is founded. Now as *hard hearing* is nothing more than a weakness of the ears—it of course follows, that by strengthening the whole nervous system—his weakness will be strengthened at the same time; consequently, hearing returns.

Further—Perhaps it may not be amiss to make known, that the remedy is not to be put into the ears.

No—not even the least particle of it.

Putting things into them has been the ruin of thousands.

On the contrary, the reader will be pleased to take notice that my principle of cure goes quite the contrary way, altogether so—and thus, by this contrary way by this new way, (if we may express ourselves) a cure is perfected—and that too, without any kind of danger to the ears, and with very little trouble to the patient.

CARDING MACHINES.

Rankin & Steel,

INFORM their friends and the public, that their machines are in complete operation, for carding wool into rolls, at the old stand in Bellefonte. The price for carding will be 8 cents per lb. Those who live at a distance may, by waiting, take their wool home in rolls. The wool ought to be well washed, and picked clean of sticks and all hard substances. One pound of grease to ten lbs. wool.

Rankin and Steel tender their sincere thanks to all those who have heretofore favored them with their custom, and hope by strict attention to business to merit a share of public patronage.

Declaration

OF

INDEPENDENCE.

IN June 1816, the Subscriber issued proposals for a splendid, and in all respects an American edition of the DECLARATION OF INDEPENDENCE; with fac similies of the subscribers to that national document.

He advertised that the size of the paper should be 36 by 24 inches; of the best quality that Mr. Amies could manufacture.

The design in *bas relief*, encircling the Declaration of Independence would be the work of Mr. BRIDPORT. It was to be surmounted by the Arms of the United States, and adorned with medallion Portraits of General Washington, John Hancock and Thomas Jefferson. The Arms of the Thirteen United States in medallion, encircled by characteristic ornaments, was meant to form the remainder of the ordon.

The whole design was to be engraved by Mr. Murray;

The interior of the Cordon by Col. Fairman;

The Portraits by Mr. Lency of New York, from original paintings;

The Fac Similies by Mr. Vallance who

has been permitted to have access to the Secretary of States' Office at Washington, for this purpose.

The Arms of the several states to be copied from official documents and executed with a particular eye to heraldic accuracy.

An expectation was entertained that the work would be ready for publication in February 1817, but this expectation cannot be realized.

The publisher duly impressed with the importance of the duty he has imposed upon himself, is determined, that all the expectations he has raised as to the Accuracy, Taste, and Splendor of the publication shall be fully realized. The difficulties that have presented themselves have been greater than was expected, and the expense incurred heavier than had been calculated: but the general approbation with which the Proposals were received, has incited the publisher to perseverance, and determines him to make this edition worthy the principles which it is intended to perpetuate, and the nation to whom it shall be dedicated.

It is needless to speak of the merits of the Artists employed: they are known: could better have been found, they would have been resorted to, on this occasion.

The Plate has been under the graver ever since last May; but such is the quantity of work, and the style of execution, that it is not yet in the power of the Subscriber to promise its completion, before the next anniversary of the day on which Independence was proclaimed.

It is found that the Paper will require to be 38 by 26 instead of 36 by 24 inches, as there is no Copper-plate Press sufficient large to work off such an impression, a Press must be made for the purpose. The difficulty of procuring official impressions, drawings and descriptions of the Arms of the respective States, has proved another source of delay. Many of those that have been received, are of so imperfect and confined a character—the drawings so inelegant, and often so inaccurate; not conforming in design to the certified description—that it was found indispensable to engage an Artist of science, taste and skill, to reconcile the discordant materials, and make the drawings harmonize with the descriptions on record. This task Mr. Sully has undertaken; and is proceeding in it with all the zeal that the subject requires; and he will complete the Arms of the several States in such a manner as to make this publication the standard of reference for accurate knowledge on the heraldry of the Union, and as a specimen of National taste.

It shall be delivered to subscribers at TEN dollars each copy, to be paid on delivery.

The engraving will be accompanied by PAMPHLET, containing the official documents connected with the publication as authorities, and a list of the subscribers' names.

The engravings will be delivered to subscribers in the order in which they may have subscribed.

It is contemplated to have some copies printed on paper prepared to carry colours, to have the Shields accurately tinted in the modern style; and the Plants, &c. coloured by one of our most approved water colourers. The price of those superb copies will be THIRTEEN dollars each. As no more of those copies will be printed than shall be subscribed for, gentlemen who wish for them, are requested to add the word "coloured" to their subscription.

As it is determined to raise the price of non-Subscribers, those who have undertaken to collect Subscriptions, and those who wish to be considered as Patrons of this National Publication, are requested to furnish their names to the Publisher, on or before the 4th day of July next, after which date, no Subscriber can be received on the terms of the original Proposals

JOHN BINNS,

No. 70, Chesnut Street.

PHILADELPHIA, Feb. 1817.

ANDREW HARPST & SONS,

RESPECTFULLY inform their friends and the public in general, that they have rented "Laurel Spring Paper Mill," (near Birmingham, Huntingdon county) from Mr. Charles Cadwallader; where they intend, by the 1st of January next, to commence the Paper-Making business, and carry it on in all its various branches.

From the experience they have had in this business, and by paying strict attention to the same and making good paper, they hope to merit and receive a liberal share of public patronage.

Those who have been customers to the above Mill, will be furnished with Paper in the usual manner; and those merchants and others who have been in the habit of king in Rags, are respectfully informed that the usual price will be given for the same.
