

THE JOURNAL.

BUSINESS ITEMS.

Any of our readers who may require the services of a Notary Public, or Commercial Agent in Philadelphia, will find a competent and accommodating gentleman in ALEXANDER MERRIN, Esq. No. 6, Goldsmith's Buildings.

It not infrequently happens that our citizens have conveying, and land business in Philadelphia. If so, we would recommend them to call on G. W. COLADAY, Conveyancer and Land Agent, No. 3, Goldsmith's Hall.

Those desiring to purchase the most excellent city furniture, at the lowest prices, will do well to call at the splendid Ware Rooms of H. C. SCENES, 177 North Second St. Philadelphia.

Although the price of leather and shoes has risen alarmingly, within a few months, yet country dealers will be agreeably surprised to discover how low they can purchase every variety of HENRY COPE & Co., Nor. West Corner of 2nd and Arch. Phila.

It is said that some of our Clearfield Merchants are selling Groceries, lower than they can be purchased in the cities. They find it very difficult, however, to sell as low as FRANKLIN PEASE & Co., at 43, Nor. Water St. Philadelphia. They have constantly on hand a splendid stock of Groceries, unsurpassed in quality and price, by any other stock in market.

All lovers of the beautiful, as well as those desiring to purchase China or Glass-ware of any description, should call at BOND & STROUD'S, splendid Queensware Store, No. 26, Nor. Fourth St. Philadelphia.

We are not sufficiently acquainted with liquor, nor do we desire to be, to speak of their good or bad qualities; but WHEELER, KLINE & ELLIS, enjoy the reputation of keeping the largest and best liquor store in Philadelphia. No. 193, North Third St. Those desiring a good article for medicinal, culinary, or sacramental purposes, will do well to try them.

The prospects of Clearfield were never brighter than at present. In view of the growing prosperity of our borough, no opportunity to secure property should be permitted to escape, and it will be seen, by reference to another column that Mr. W. W. REEDY, has three lots for sale.

Our friend GEORGE W. ORR, whose health is failing, and who fears he will be compelled to relinquish entirely his present business of Blacksmithing, calls upon those indebted to him to come forward and settle up.

As new firms are the order of the day, it will be seen that ORR & KLINGER have entered into co-partnership in the Blacksmithing business. They are good mechanics, and clever fellows. For every pound of iron, may they get in two pounds of the "white and yellow boys."

It is frequently difficult to obtain Account Books such as we desire, and for Justice to obtain Books to suit them. They are made to order at the Wholesale Book and Paper Store of J. HOLLIGHERY, No. 24, North Front St., Philadelphia.

Our Blacksmiths, Merchants, and others, desiring to purchase Figs, Bar, and other Irons, or those wishing to obtain Water Pipes, can do so at CHAS. R. CAMPBELL & Co's, No. 199, North Water St. and 54 North Wharves, Philadelphia.

The Emperor Nicholas is said to have expressed considerable apprehensions of an attack on St. Petersburg, by the allies, and MOYER ULMAN feels that the crowds continually rushing to his New and Cheap Clothing Store, will take it by storm. His goods are the cheapest in the country—at least he says so. Go and try them.

It is an old maxim that "Competition is the life of trade." If so, "trade" in Clearfield has considerable vitality just now, and R. SHAW & Son have just received the most excellent and elegant Stock of Goods, brought into the country, which they sell cheap for Cash, at their New Store in the West end of the Mansion House.

Prince Paul, of Wurtemberg, is now in this country, selecting botanical and ornithological specimens; but we doubt if he has met, in all his travels, with more beautiful, excellent and cheap specimens of furniture, than are to be seen at the Ware Rooms of DANIEL BENNER in this borough. Call and take a look.

Yankee Lumbermen in Canada.

Since the close of the Baltic to a valuable timber trade, a great impetus has been given to that on the American side of the Atlantic; great quantities have been shipped from the Pacific during the past winter, for France, and the Maine Lumbermen never were so busy as they have been during the past season. But the greatest scene of lumber activity on our continent, for the past two years, we understand, has been in Canada. About two years ago the Canadian Government threw open to competition an immense tract of timber land, lying on the bank of the St. Maurice, midway between Montreal and Quebec. The Government of Canada was liberal in the terms which it offered. A tract of territory consisting of two thousand square miles, covered with red and white pine, was divided into portions of fifty square miles, and the right to cut for a given number of years was sold at auction in Quebec in the month of July of each of the last two years. And a number of our Eastern lumber merchants availing themselves of the advantages then held out, bought tracts, and began operations on a grand scale. Messrs. Nacross, Phillips, & Co., of Lowell, we understand, have now one of the largest lumber establishments in Canada. They have extensive sawmills at the junction of the St. Maurice with the St. Lawrence, and it is said had a thousand men employed by them in cutting logs the last winter. There were employed last winter in the timber territory named six hundred pair of horses, and five thousand men, and never before did such activity exist in the North American timber trade. The old saying "it is an ill wind that blows nobody good," may be aptly applied to wars in Europe; although they do immense evil to the people in other countries, which are the scenes of strife, they benefit us in America, by increasing our commerce, and calling fourth greater industrial effort.—Scientific American.

Physiologists have not only discovered that man is an engine, gliding along the track of life often at the rate of sixty miles an hour; but he is also a steamship—a chemical laboratory—a distillery (not, however, of alcohol)—a forcing pump—a grist mill—an iron mine—a manufactory—a commercial city—an electric telegraph—in short, he is a crystal palace, where we can go and examine the choicest works of art—the most exquisite development of science.

Iron and Coal.

Potosi may boast of silver, and California of gold, but our men of metal have greater cause to congratulate themselves in possessing Mines of iron, with which all our emporiums are likely to be benefitted. We have built buildings and household furniture of iron—ships, and marbled iron.—The cheaper this precious metal is rendered, the more general will be its applications. For the Cause of Iron, like Proteus, can assume any shape, while its utility is ever on the alert among our plastic spirits of enterprise. All we want are men with iron constitutions to carry out those gigantic projects which are destined to distinguish our land of refuge as the mightiest Republic ever established since the world was created.

In anthracite regions, beyond the mountains of Allegheny, in Tennessee, and in Ohio, the metal abounds. Ages must pass away ere Pennsylvania's veins are exhausted, producing from 30 to 60 per cent. of metallic iron; but even there, an impotent government might check the progress of skill and science, by withdrawing protection, and years may elapse before the price of material is reduced which can only be effected by multiplying mechanical contrivances for reaching it. Every means should be provided to facilitate the progress of miners and founders. Pittsburg, alone supplies the whole Union. Importations from the old country cannot much longer be depended on; her resources are beginning to fail, and at the present state of political anarchy in Europe should warn us to look at home and feel conscious of our wealth teeming in Cuyahoga's treasure house which cannot be too highly appreciated.

The popular mind has been dazzled with golden visions of Eldorado, but we should remember all is not gold that glitters, and those who possess a surplus capital may easily excel in alchemical pursuits, by extracting gold from iron. No safer investment exists, as our traffic in this useful metal will be in a few years be independent of England.

Steam machinery and railways must be applied more extensively, not only for the transit of ore, but coal also which is the fuel that feeds the flame of science. Liberal outlays will ensure large dividends. The improved mode of navigating the Ohio, and the adoption of half iron vessels, is already diminishing the expenses of freightage from Pittsburg, the Birmingham of America. Like Sinbad, let us not roam in a valley of (black) diamonds, without being able to work them to the fullest extent. Geologists are our pioneers, whose reports may be fully depended on. Under primitive forms beneath the hydrographical basin of Ohio—the beds are inexhaustible, where shafts have never been reached. Through Pennsylvania, Virginia and Ohio, a continuous strata, varying from five to nine feet in depth, has been traced to the extent of 225 miles—100 miles wide.—The consumption for the present year will increase considerably. From Pittsburg alone, exports will average not less than 1,200,000 tons. Gas works and steam engines are now indispensable to an energetic race of utilitarians, so while adventurers are rocking their cradles, containing gold idols, let us keep pace with the march of intellect, rule the world pacifically, with rods of iron, and in the subterranean treasuries of old King Coal.

Baltic Theatre of the War. The Baltic promises to become soon the theatre of the most destructive naval warfare yet recorded. In regions of gigantic murder, means yet untried will be brought to bear, rapid and terrible in their execution, and destined to mark an era in naval contests. On the Baltic especially they will be a novelty.

The principle theatre of the war will be the Gulf of Finland, and the entrance to the Gulf of Bothnia. In regions of gigantic murder, means yet untried will be brought to bear, rapid and terrible in their execution, and destined to mark an era in naval contests. On the Baltic especially they will be a novelty.

Disastrous Fire at Hollidaysburg, June 21. A destructive fire broke out in the grocery and liquor store of F. H. Douglas & Co., in Junata street, at half-past 11 o'clock last night. Before the flames could be checked ten buildings were destroyed. The following are the places destroyed: Rock's shoemaker shop, Douglas & Co's grocery, Martin's paint shop, the confectionary store of Mrs. Lewis, A. P. Baker's saddlery and harness shop, Gans and Keipnort's clothing store, the barber shop of George Haas, Doctor Rodriguez's drug store, Black's confectionary and bake house, and the stable of Dr. Rodriguez. The whole corner of Montgomery and Junata streets is in ruins. The flames spread so rapidly that very few goods could be saved. The loss will not, probably, fall short of \$20,000, on which there is a partial insurance. The fire was undoubtedly the work of an incendiary.

It is said that the eldest daughter of Mr. Henry Ludlam, of New York, is about to be espoused by the Hon. Lewis Gass, Jr. our charge at Rome, where the fair fiancee is at present sojourning.

A College Student being examined in Locke, where he speaks of our relation to the Deity, was asked, "What relation do we most neglect?" He answered with much simplicity, "Poor relation, sir."

The Administration.

President Pierce has signified his Administration thus far, by efforts to REPEAL THE MISSOURI COMPROMISE and get up a WAR WITH SPAIN! The government is evidently in the hands of rash men—who cannot realize the responsibilities of a great Republic like this, but who sport and trifles with the greatest and gravest questions. The recent course of the President and his organ is the more remarkable, when we remember the following conservative language in the Inaugural Address:

"We have nothing in our history or position to invite aggression; we have everything to beckon us to the cultivation of relations of peace and amity with all nations. Purposes, therefore, at once just and pacific, will be significantly marked in the conduct of our foreign affairs. I intend that my administration shall leave no blot on our fair record, and trust I may safely give the assurance that no act within the legitimate scope of my constitutional control will be tolerated, on the part of any portion of our citizens, which cannot challenge the justest rebuke before the tribunal of the civilized world. An administration would be unworthy of confidence at home, or respect abroad, should it cease to be influenced by the conviction that no apparent advantage can be purchased at a price so dear as that of national wrong and dishonor. The great objects of our pursuit, as a people, are best to be attained by peace, and are entirely consistent with the tranquility and interests of the rest of mankind.—Penna. Ledger.

The Trade of Lake Erie.

The report to the Legislature of this State upon the Sumbury and Erie Railroad presents some facts in regard to the increase of tonnage in the State of Ohio, and Lake Erie. In 1840, the aggregate population of Ohio, Indiana, Michigan and Wisconsin was 1,456,295. In 1850 the population of the States named was 4,525,370, exhibiting another increase in ten years of about 1,700,000. The population of Ohio alone was 1,510,000. The increase in fifty years is nearly four millions and a half. In each period of ten years the population has nearly doubled. To these States must be added the trade, travel and commerce of Lake Erie, that vast region of country which reaches from the Saint of St. Mary's to the western prairie States, and which is rich in mineral wealth and of great agricultural capacity, and presenting an extent of inland ship navigation, by means of internal improvements, nowhere else to be found. By means of the Welland Canal, now enlarged for vessels, Lake Ontario and the river St. Lawrence are added to Erie, Huron, Michigan and Superior. It is shown to be practicable that the Mississippi river may also be connected with Lake Michigan by a canal for vessels of deep draught. When that is accomplished, the trade, travel and commerce there thrown upon the lakes may itself exceed by many per cent. the present apparently extraordinary business of Erie.

The Plundering.

If any body supposes that the plundering of the Public Works has ceased since the bill authorizing their sale has become a law, they suppose a very silly thing. Operations in this way go on as usual, or perhaps more briskly than before, in view of the threatened sale, which would cut short the business. The Tax-payers will understand they have no right to stop the plundering, and they are not to be stopped. Economy is a word that has no place in the vocabulary or practice of the dynasty now in power. Plunder—plunder—plunder—appears to be their never-ceasing thought and occupation.—Hollidaysburg Register.

AN EXPLANATION.—The New York Commercial explains by a singular hypothesis the vast and ready preparation in England, which has entered upon the war. These preparations were, to a great extent, made several years ago, when there were rumors of a disposition on the part of the French to "avenge Waterloo," and when even a French invasion was talked of, and the best modes of meeting it were discussed. The Commercial says that the French and English governments, both of which were aware of the designs of Russia upon Turkey, and both of which perfectly understood each other. The English Government could not go on with preparations for war, without a pretext; the French labored under such disadvantages, and could not put out any other reason than the will of the ruling power, and thus both, under pretence of arming against each other, were making ready for a united attack upon a common enemy.

Sympathy for Russia.—It is very satisfactory to perceive, that the extraordinary attempt of the Washington Intelligencer, and the London Standard, to excite sympathy in this country in favor of Russia, and in opposition to Turkey and her allies, England and France, has signally failed. Although these two papers, as political organs, stand among the highest in the United States, it is gratifying to know that they possess no influence to commit the great organs of the country to a course of inherent principles of the American people in favor of Right and Liberty. In this diabolical effort, these papers stand alone; and to the everlasting honor of the press of the country, be it known, that so far as we are cognizant, the proposition has either met with silent contempt, or has met with the most decided opposition. When partisan newspapers exhibit their independence of action in so emphatic a manner, they should not only exercise a powerful sentiment for good, but command the respect of all whose respect is worth having.—German-town Telegraph.

CLARION Co.—An assignee's sale was made in Clarion on Monday, 21st ult., of "Clarion Furnace," "Martha Furnace," and the "Reed Land," late the property of Judge Moyers, J.N. Hetherington, Esq., became the purchaser. "Clarion Furnace" and six thousand acres of land, sold for \$10,000; "Martha Furnace" and property attached, for \$8,610; the "Reed Tract" containing two hundred acres, for \$650. All for \$14,140. Martha Furnace is very valuable, being now in successful operation.—Clarion Furnace is not now in blast, but offers rare inducements for those desiring to enter into the manufacture of iron.—A man named Daniel McDaniels, died on Monday, 1st inst., at Sligo Furnace, from excessive drinking.—The crops throughout Clarion county are very backward. A very short harvest is expected.

It is said that the eldest daughter of Mr. Henry Ludlam, of New York, is about to be espoused by the Hon. Lewis Gass, Jr. our charge at Rome, where the fair fiancee is at present sojourning.

A College Student being examined in Locke, where he speaks of our relation to the Deity, was asked, "What relation do we most neglect?" He answered with much simplicity, "Poor relation, sir."

Congressional Bullies and Blackguards.

The Senate of the United States is partially redeemed from the disgrace of WELLES and others, because it is overshadowed by yesterday's proceedings in the House of Representatives, by two members from Tennessee, Mr. W. M. CHURCHWELL and his colleague, Mr. W. A. CULLOM, had made a charge in the report published in the Globe of that morning, which he did not make in the debate of the previous day, and which was false. Amid much confusion and cries of "order, order!" Mr. CULLOM leaped over the desks which separated him from Mr. CHURCHWELL and reached towards him. He was immediately seized by the surrounding members, and while they were holding him he made the most violent efforts to get free, at the same time shaking his fist at Mr. CHURCHWELL, exclaiming—"You are a liar! a d-d liar! a d-d scoundrel!" Great confusion ensued, and the Sergeant at Arms went with his lance towards Mr. CHURCHWELL, but it was some time before order could be restored. During the height of the excitement Mr. CHURCHWELL had a pistol drawn and cocked. Is there not self-respect and dignity enough left in the House to expel both these Honorables by courtesy—CULLOM for his blackguard language, and CHURCHWELL for drawing a pistol, and being so long in the village debating society in the land which would not kick a fellow out for using such language, and thus outraging all decency.—Phila. Sun.

Anti-Nebraska Meeting in Indiana.

CINCINNATI, June 15.—A large and enthusiastic anti-Nebraska meeting was held at Madison, Indiana, yesterday, composed chiefly of Democrats. Resolutions were passed, repudiating the Democratic platform manufactured at Indianapolis, recently, on the ground that it pledged the Democracy to the extension of slavery to the Territories. It was also recommended to hold a Mass Convention at Indianapolis, on the 13th of July.

The Hon. John Pettit attempted to address the people of Lafayette, on Monday, on the Nebraska bill. He met with a stormy reception, and during his speech, he was groaned and hissed. A resolution was passed, and the series of resolutions offered, the confusion and excitement was so great that the question could not be decided. The people of his district exhibited unmistakable marks of their disapprobation of his course on the Nebraska bill.

On the adjournment of the late session several good things were said and done, not the least of which was this. An honorable member from our city offered the following resolution: Resolved, That a Committee be appointed to inquire how many members of this honorable body are qualified to be members of the "Know Nothing" Association.

The gentleman who offered the resolution, and who was in the large majority of parties in the House, informs us that on inquiry it was found that about two-thirds of the members were found to be qualified.—N. O. Pickayaw.

The Know Nothings.—The New York Herald of Thursday says:

"The recent occurrences in Philadelphia, Washington and Kingston, are only the forerunners of a revolution which will be liable to upset the best laid plans of politicians for the next year or two."
