GIVE THEM A TRIAL—SILVER'S PLASTIC PAINTS.

CLEAR, DURABLE, AND PROTECTIVE WEATHER & FIRE-PROOF.

These Paints will stand any climate, without crack or blister, and harden by exposure; thus making in time an enamel of Stone, protecting Wood from decay, and Iron and other metals from rust and corrosion. They differ essentially from the so-called Mineral Paints of the day, which are principally Ochres, and Clays, and are entirely worthless. SILVER'S Plastic Paints are purely METAL-LIC, containing no Alumina or Clay. They are levigated finely, mix readily with Linseed Oil, (without the trouble of grinding), and flow under the brush as freely as the best White Lead, and excel all others in body or covering properties, one pound of which will cover as much surface as two pounds of White Lead, reducing the cost two-thirds. There are six distinct colors, viz. Olive, Light Brown, Light Chocolate, Black, Dark Do., Deep Do. All equally valuable for a preservative, and particularly adapted to painting the outside of BUILDINGS, FENCES, STAMBOARDS, CARS, TIN AND IRON WORKS.

REMEMBER! Exposure hardens and increases the durability of these PAINTS. DIRECTIONS.—Mix with pure Linseed Oil, as thickly as possible, as the Paint is the lasting or protecting body, and use oil richly the medium, or apply with a brush.
