TMPORTANT TO HOUSEKEEPERS AND FRUIT GROWERS .--- ARTHUE'S PATout Air-Tight Self-Scaling Caus and Jars, for Preserving Fresh Fruits, &c. This invention for which a patent has been obtained, commends itelf to the attention of Hodsekeepers and others, on account of its great simplicity, and the effects al manner in which it accomplished a very desirable and useful object

The cans and jars are constructed with a channel around the mouth, nerr the top, into which the cover fits loosely. This channel is filled with a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vessel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much case as it is closed, by slightly warming the top. The ordinary tin cans, used for the same purpose for which this is intended, cannot be closed, as is well known without the aid of a tinner; are difficult to open, and are generally so much injured in opening as to be useless for future service. By this simple contrivance, the process of her-

metical scaling is placed conveniently within the reach of every individual; and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time. For sale by MERRELL & CARTER. Clearfield, Sept. 19, 1855 tf.
