

KATY VAT LIPS ON DE BLAIN.

The following parody on Tannahill's universal... popular song, "The Flower of Dunblain," was written, it is thought, by the Hon. James M. Porter, of Easton. It is one of the best of its kind.

A LADY ON BEARDS.—A fair correspondent of the Home Journal has the following sensible remarks on the wholesome habit of shaving the beard, which has lately come into fashion.

"It is astonishing what change a few years has wrought in regard to shaving. Once, everybody shaved, but now, I must mistake, if every gentleman has not found to shave or not to shave, a question suggested by his morning toilet."

BRIEF HISTORY OF GUANO.

The London Farmer's Magazine furnishes the following comprehensive history of Guano:—"Guano, as most people understand, is imported from the islands of the Pacific, mostly of the Chincha group, off the coast of Peru, and is the dominion of that government. Its sale is made a monopoly, and the avails, to a great extent, go to pay the British holders of Peruvian government bonds, giving them, to all intents and purposes, a lien upon the profits of a treasure intrinsically more valuable than the gold mines of California. There are deposits of this unappreciated fertilizer in some places to the depth of sixty or seventy feet, and over large extents of surface.

The Guano fields are generally conceded to be the excrement of aquatic fowls, which live and nestle in great numbers around the islands. They seem designed by nature to rescue, at least in part, that untold amount of fertilizing material which every river and brook is rolling into the sea. The wash of alluvial soils, the floating refuse of the field and forest, and, above all, the wasted materials of great cities, are constantly being carried by the tidal currents out to sea. These, to a certain extent, form the respiratory functions, and indirectly, submarine vegetable and animal life, which in turn goes to feed the birds, which in our day are brought away by the shipload from the Chinese Islands.

The bird is a beautifully-arranged chemical laboratory, fitted up to perform a single operation, viz: to take the fish as food, burn out the carbon by its respiratory functions, and deposit the remainder in the shape of an incomparable fertilizer. But how many ages have these depositions of seventy feet in thickness been accumulating? That little bird, whose individual existence is as nothing, should in its united action produce the means of bringing back to an active fertility whole provinces of waste and barren lands, is one of a thousand facts to show how apparently insignificant agencies in the economy of nature produce momentous results."

TURKISH FLINT WHEAT.

There have been received at the Patent Office one hundred bushels of Turkish flint wheat, procured by the United States Dragoman at Constantinople from the foot of Mount Olympus. The wheat has already been tested in Virginia and Maryland, and has proved both hardy and productive. It possesses, in a remarkable degree, the quality of long keeping, as was indicated by a sample grown in this country, by Captain Porter of the Vary, four years ago. We learn that the Sultan takes a lively interest in the affairs of this country, and has intimated that there are other wheats in his dominions which would be highly desirable for our government to obtain.

THE NEW-YORK TRIBUNE, 1855-6.

The Tribune is now in the middle of its fifteenth year, Vol. XV. of its weekly issue commenced on the 1st of September last. The American public need not now be acquainted with the character or claims to commendation in respect to its editorial management, policy and popularity. It has aimed to stand for Righteousness, for Truth and for Freedom. It has never flinched in its support of the oppressed, and its editor, who does not know and hate the Tribune; there is not an extensive fabricator of drugged and poisonous Liquors who does not consider it a very dangerous and immoral paper, and who would wish its publication to be tolerated in a community so virtuous and upright as New-York. The Tribune has been a hard, fighting, scrupulous avenger of every wrong, and has not hesitated to expose the misdoings of the powerful and the rich, and to denounce the misdoings of the weak and the poor. It has been a prompt and plain-spoken in its denunciations of Iniquity and abuse of power, whilst claiming no exemption from human fallibility. It may have done wrong in some instances, but it has never been unfaithful to Principle, nor deaf to the cries of the wronged and suffering. In its columns the advocates of novel and unpopular theories concerning the rights of man, have been especially those of the rolicious and down-trodden, have ever found audience and hospitality; while it has already rendered, and will persistently continue, every attempt to oppress and degrade any human being because of his color, or his race, or his condition of mind, or his social position, or his political opinions, and in its denunciations of Iniquity and abuse of power, whilst claiming no exemption from human fallibility.
