BUCHANAN AND LOW WAGES.

On the 22nd January 1840, Mr. Buchanan made a speech in the United States Senate, (vide Congressional Globe, for Jan. 1840, pp. 135-6. or Niles' Register vols. 67 and 68,) in which the following passages occur :--

"In Germany, where the currency is purely metalic, and the cost of everything is hand-ap to a hard money standard, a piece of broadcloth can be manufactured for fifty dollars, the manufacture of which, in our country from the expansion of paper currency would cost one hundred dollars. What is the consequence? The foreign French and German manufacturer imports this cloth into our country and sells it for a hundred. Does not every person perceive that the redundancy of our currency is equal to a premium of one hundred per cent. in favor of the manufacturer.

"No tariff of protection, unless it amounted to prohibition, could counteract these advantages in favor of foreign manufactures. I would to heaven that I could arouse the attention of every manufacturer of the nation to

cotton, we cannot obtain exclusive possession of the home market, and successfully contend for the markets of the world ? It is simply because we manufacture at the nominal prices of our own inflated currency, and are compelled to sell at the real prices of other nations. REDUCE OUR NOMINAL STANDARD OF PRICES THROUMHOUT THE WORLD, AND YOU COVER OUR COUNTRY WITH BLESSINGS AND BENEFITS.

"The comparative Low PRICES of France and Germany have afforded such a stimulous to their manufactures, that they are now rapidly extending themselves, and would obtain possession, in no small degree, even of the English home market, IF IT WERE NOT FOR THEIR PROTECTIVE BUTIES. While British manufactures are now languishing, those of the continent are springing into a healthy and vigorous existence."

Having thus given Mr. Buchanan's own smooth and polished language, let us see what is the meaning of it in plain English, when he says "reduce our nominal standard of prices the country with blessings and benefits."-Now, what did Mr. Buchanan mean by this language, if he meant anything, but that our standard of prices should be reduced to that of the hard money currency of Europe ? And what is the European standard then, to which he desired our own to be reduced ? According to the best authorities on that subject, Porter's Progress and Wade's History of the Middle and Working Classes, two recent publication's, containing statistics collected by the British Government, the standard of prices for labor in Europe, is as follows :---

Wages in France .- Calais common laborers 71d, per day, with board, and without dwelling; Boulogne, 5d. per day, do. do.; Nantes, 8d, per day, without board and without dwelling ; Marseilles. 4d. to 7d. per day, with board and without dwelling. Saxony .- "In 1837 a man employed in his own loom working very diligently from Monday morning to Saturday night, from 5 o'clock in the morning until dusk, and even at times with a lamp, his wife assisting him in finishing and taking him the work, could not possibly earn more than 20 groschen (about 60 cents) per week. Nor could one who had 3 children aged 12 years and upwards, all working at the loom as well as himself, with his wife employed doing up the work, earn in the whole more than \$1 weekly."

These are facts which speak for themselves. This is the doctrine of James Buchanan, in 1840. Ten cents is about the average standard of European labor. And it is to this standard he wished ours to be reduced. How do you like it, ye honest laboring men of Pennsylvania?

I PRUIT GROWERS .--- ARTHUR'S PAT-The undersigned having taken the old well known house, which has been renovated and re-modeled throughout, respectfully solicits his Clear-field friends to give him a call on their visits to ent Air-Tight Self-Sealing Cans and Jars, for Preserving Fresh Fruits, &c.-This invention for which a patent has been obtained, commends itself to the attention of Housekeepers and others, on account of its great simplicity, and the effecta-al manner in which it accomplished a very desirable and useful object

The cans and jars are constructed with a channel around the mouth. nerr the top, into which the cover fits loosely. This channel is filled with a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vessel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much ease as it is closed, by slight-ly warming the top. The ordinary tin cans, used for the same purpose for which this is intended. cannot be closed, as is well known without the aid of a tinner; are difficult to open, and are generally so much injured in opening as to be useless for future service.

By this simple contrivance, the process of hermetical sealing is placed conveniently within the reach of every individual; and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time. For sale by MERRELL & CARTER
