IMPORTAN'I TO HOUSEKEEPERS AND FRUIT GROWTRS.---ARTHUR'S PAT-ent Air-Tight Silf-Sealing Cans and Jara, for Preserving Frish Fruits, Co. This invention for which a patent has been obtained, commends it-self to the attention of Housekeepen, and others, on account of its great simplicity, and the effectu-al manner in which it accomplished a very desi-rable and useful object

a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the ves-sel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much ease as it is closed, by slightly warming the top. The ordinary tin cans. used for the same purpose for which this is intended, cannot be closed, as is well known without the aid of a tinner, are difficult to open, and are generally so much injured in opening as to be useless for

future service. By this simple contrivance, the process of hermetical sealing is placed conveniently within the reach of every individual; and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time.
