I FRUIT GROWERS .--- ARTHUR'S PATent Air-Tight Salf Sealing Cans and Jars, for Preserving Fresh Fraits, &c. —This invention for which a patent has been obtained, commends it-self to the attention of Housekeepers and others, on account of its gract discussion account of the second on account of its great simplicity, and the effectu-al manner in which it accomplished a very desirable and useful object

The cans and jars are constructed with a channel around the mouth, near the top, into which the cover fits loosely. This channel is filled with a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vesand allowed to harden. In order to seal the ves-sel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much case as it is closed, by slight-ly warming the top. The ordinary tin cans. used for the same purpose for which this is intended, cannot be closed, as is well known without the aid of a tinner; are difficult to open, and are generally

so much injured in opening as to be uscless for future service. By this simple contrivance, the process of her-

metical scaling is placed conveniently within the reach of every individual; and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time. For sale by MERRELL & CARTER.
