IMPORTANT TO HOUSEKEEPERS AND FRUIT GROWERS.—ARTHUR'S PATENT Air-Tight Self-Sealing Cans and Jars, for Preserving Fresh Fruits, &c.—This invention for which a patent has been obtained, commends itself to the attention of Housekeepers and others, on account of its great simplicity, and the economical manner in which it accomplished a very desirable and useful object.
The cans and jars are constructed with a channel around the top, into which the cover fits loosely. This channel is filled with a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vessel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much ease as it is closed, by slightly warming the top. The ordinary tin cans, used for the same purpose for which this is intended, cannot be closed, as well known without the aid of a tinner; are difficult to open, and are generally so much injured in opening as to be useless for future service.
By this simple contrivance, the process of hermetical sealing is placed conveniently within the reach of every individual, and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an indefinite length of time. For sale by

Yours with great respect, ED. W. PERBLE, Clerk of Superior Court.

Epilepsy Disorders and Liver Complaints. Department of the Interior, Washington, D. C., Feb. 1856.

Sir: I have used your Pills in my general medical practice ever since you made them, and cannot hesitate to say they are the best Cathartic we employ. Their regulating action on the bowels, and their tendency to purify the blood, are an admirable remedy for derangements of the system. I have used them in a case of bilious disease so obstinate that it would hardly yield to other means. I have used them in a case of bilious disease so obstinate
