IMPORTANT TO HOUSEKEEPERS AND FRUIT GROWERS .-- ARTHUR'S PAT. ent Air-Tight Self-Sealing Cans and Jars, for Preserving Fresh Fruits, &c. This invention for which a patent has been obtained, commends it-self to the attention of Housekeepers and others, on account of its great simplicity, and the effectual manner in which it accomplished a very desi-rable and useful object

The cans and jars are constructed with a channel around the mouth, near the top, into which the cover fits loosely. This channel is filled with a very adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vessel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much ease as it is closed, by slightly warming the top. The ordinary tin cans, used for the same purpose for which this is intended, cannot be closed, as is well known without the aid of a tinner; are difficult to open, and are generally

so much injured in opening as to be useless for By this simple contrivance, the process of hermetical scaling is placed conveniently within the reach of every individual; and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time. FOR THE RAPID CURE OF COUGHS, COLDS, HOARSENESS, INFLU-ENZA, BRONCHITIS, WHOOPING COUGH, CROUP, ASTRMA, IN-CIPIENT CONSUMPTION, and for the relief of consumptive patients in advanced stages of the disease.

We need not speak to the public of its virtues. Throughout every town, and almost every hamlet of the American States, its wonderful cures of pulmonary complaints have made it already known. Nay, few are the families in any civilized country on this continent without some personal experience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the subtle and dangerous diseases of the throat and lungs. While it is the most powerful antidote yet known to man for the formidable and dangerous diseases of the pulmonary organs, it is also the pleasantest and safest remedy that can be employed for infants and young persons. Parents should have it in store against the insidious enemy that steak upon them unprepared. We have abundant grounds to believe the Curenty Perconat saves more lives by the consumptions it prevents than those it cures. Keep it by sumptions it prevents than those it cures. Keep it by you, and cure your colds while they are curable, nor neg-lect them until no human skill can master the inexorable canker that, fastened on the vitals, eats your life away.

All know the dreadful fatality of lung disorders, and as they know too the virtues of this remedy, we need not do more than to assure them it is still made the best it can be. We spare no cost, no care, no toil to produce it the most perfect possible, and thus afford those who rely on it the best agent which our skill can furnish for their cure.
