O. how my child-heart loved you then, For teachings giv'n to me; It ever beats with gratitude When thought turns back to thee

Dim recollections come again, Of days now long gone by; Bright days of joyous mirthfulness, 'Neath childhood's sunny sky.

Oh, that these days might come again, The happiest days that ever came, In childhood came to me.

TO MY TEACHER, D. M. You taught me in my childhood; A teacher good wert thou; With kindness ever in your face, And on your noble brow.

So good, so gentle, and so kind, Our plea you always heard, And chid us all so tenderly Whenever we had err'd.

Ah me! I fancy I see yet Those mild blue eyes of love, And dark hair lying back in folds, That lofty brow above.

O Death !"why aim thy ruthless shaft At one so young as he; So noble, too, so much beloved As he e'er seemed to be.

TO MY TEACHER, S. F. You taught me in my girlhood; A teacher good wert thou; With kindness ever in your face. And on your high white brow;

A teacher good as ever was-For this was said to me Oft times, "He who instructs you, Labors most faithfully.

Even, as yesterday, I see Those large and smiling eyes, In which is ever playfulnes Mirthfulness that ne'er dies.

If on these lines those eyes may fall Perchance, in future years; Pray stop and east a thought on her Whose hand has traced them here. **NOVEMBER**, 1856.

MPORTANT TO HOUSEKEEPERS AND FRUIT GROWERS .--- ARTHUR'S PATent Air-Tight Self-Sealing Cans and Jars, for Preserving Fresh Fruits, &c.—This invention for which a patent has been obtained, commends it-self to the attention of Housekeepers and others, on account of its great simplicity, and the effectual manner in which it accomplished a very desi-

rable and useful object The cans and jars are constructed with a channel around the mouth, near the top, into which the cover fits loosely. This channel is filled with adhesive cement, prepared for the purpose and allowed to harden. In order to seal the vessel hermetically, it is only necessary to heat the cover slightly, and press it into place. It may be opened with as much ease as it is closed, by slightly warming the top. The ordinary tin cans, used for the same purpose for which this is intended, cannot be closed, as is well known without the aid of a tinner; are difficult to open, and are generally so much injured in opening as to be useless for

By this simple contrivance, the process of her metical scaling is placed conveniently within the reach of every individual, and fruit, vegetables and butter (if properly prepared) may be kept, with their natural flavor unimpaired, for an in definite length of time. For sale by MERRELL & CARTER.

We need not speak to the public of its virtues. Throughout every town, and aimest every hamlet of the American States, its wonderful cures of pulmonary compaints have made it already known. Nay, few are the families in any civilized country on this continent without some personal experience of its effects; and fewer yet the some personal experience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the subtle and dangerous diseases of the threat and lungs. While it is the most powerful antidote yet known to man for the formidable and dangerous diseases of the pulmonary organs, it is also the pleasantest and safest remedy that can be employed for infants and young persons. Farents should have it in store against the insidious enemy that steals upon them unprepared. We have abundant grounds to believe the Carney Paccoran saves more lives by the consumptions it prevents than those it cures. Keep it by you, and cure your colds while they are curable, nor neglect them until no luminus skill can master the inexorable canker that, fastened on the virials, eats your life away. All know the dreadful fatality of lung disorders, and as they know too the virious of this remety, we need not do more than to assure them it is still made the best it can be. We spare he cost, so care, no tool to produce it the most perfect possible, and thus afford those who rely on it the best agent which our skill can furnish for their cure.
