Dear reader-Having the statement, &c., of manner is here something new; but I firmly believe that was it a general custom, education at this time would be in a more flourishing condition. Every one who has attended a high school knows with what zeal even the most stupid student labors, that he may be honored by a high standing in the catalogue of the institution of which he is a member. And if young men and women would toil with such diligence, what would be the interest exercised by the boys and girls of our common achools? Upon opening this school, I classed my scholars most conveniently, and kept a daily record of their recitation and deportment, telling them that I intended having the news received by Magnetic Telegraph and Mails. We shall give particular attention to our Local deresults published. This animated every pupil partment, and endeavor to make the Reports as far beyond my expectations, and the result is, full and interesting as possible. The Editorial Dethat a class in Arithmetic, which is entirely a and experienced gentlemen, who upon all quesyoung class, having never before worked a tions affecting the publis, will express their opin-ions fairly and freely. Our next Legislature will be entrusted with several important duties—the terly baffled two of our teachers.
