IMPORTANT DECISION .- We last week made brief mention of a decision of the U.S. Circuit Court in an action brought by Zebulon Parker against Wm. Bigler, Wm. Powell and John F. Weaver, of Clearfield, to recover damages for the infringement of a patent granted to Parker in 1829, for an improvement on hydraulic power, called a Percussion and Re-action Water Wheel. This case, which was tried on the 12th and 18th of May inst., was regarded with some interest, says the Pittsburgh Commercial Journal, as being the first trial of a suit in this Court for the infringement of this patent. There are many other similar cases pending, and it was supposed that the result of one would lead to the abandonment or settlement of the remainder. The plaintiff proved his title by his patent and various assignments. In connection with this part of the case, it was held by Judge Grier, upon authority and for the purpose of securing uniformity of practice in the second Circuit, that a certified copy from the Patent Office, of an assignment recorded therein, would be received as prima facie evidence of the genuineness of the origi- Hollidaysburg, one day last week, and would nal assignment, and that the production of have been drowned but for the timely aid of such original might be dispensed with. It is proper to add that it was remarked by one of the plaintiff's attorneys, in the course of the trial, that the great mistake of infringes which had led to so much litigation, was the supposition that Parker invented a particular form of wheel. This was not the case. Parker's invention consisted in his peculiar method of applying the water on any reaction
