THE JOURNAL.

CLEARFIELD, PA., SEPT. 8, 1858.

REMOVAL .- Robert J. Wallace, Esq., has removed his Law office from the east end of the County Buildings to Shaw's new Row, opposite the Journal office.

OUTRAGEOUS .- On Saturday night some vicious scoundrels tore the limbs off a beautiful Siberian crap apple tree in the lot of Thomas Mills, in this borough, and also injured his grape vines. Such conduct is reprehensible in the extreme, and the perpetrators are deserving of the severest punishment.

MORE CANDIDATES .- By referring to our advertising columns, it will be seen that James Irwin, Sr., offers himself as an independent candidate for Sheriff, and Michael A. Frank, Esq., as an independent candidate for the Assembly. Wm. A. Nichols, Esq., of McKean county, will also be supported as a candidate for the Legislature. This district elects two members to the Legislature.

DEAD .- We learn that young Andrews, who was stabbed at Phillipsburg on the 30th August, by Porter, died on last Saturday night about 11 o'clock. We believe the facts of the case are as we stated last week. Porter is a man somewhat advanced in years, and, we understand, of intemperate habits. Andrews, with others, undertook to put him in an outhouse, when Porter stabbed him in the abdomen with a pen-knife. Porter was taken to the Bellefonte jail to await a trial.

QUACK DOCTORS .- It seems to us as if people liked to be humbugged. Almost every strolling imposter that comes along finds plenty of persons who are willing to be fleeced by him. It is lamentably true that people, when sick, are ever ready to avail themselves of the advice of travelling humbugs. In a great many towns quackery is much more profitable than legitimate, honest practice-and well educated, skillful and regular bred physicians are almost starved, while a travelling quack doctor, who knows nothing about medicine, pockets lots of cash, and goes away laughing in his sleeve to think what a vast number of tools are in the world. We have seen men, who would sneer at a worthy physician, launch out ten or twenty dollars cash in advance, to a humbug specialist who was utterly ignorant of the laws which govern the human system, and unacquainted with the first principles of medicine. And yet there is no such great wonder in this, after all, when we consider how chary regular physicians are about touching printer's ink. A system of liberal advertising would be deaf and dumb children, during the years 1855 an effectual preventive of quackery.

SCHOOL EXHIBITION .- We recently had the pleasure of attending a School Exhibition at Philipsburg, and if this manifestation of men- fat job that. One that will be fell by Mr. tal culture, is any criterion by which to judge Snyder. of the enterprize and intelligence of a com- OF Describes-a Kansas City Journal. manity, we must certainly conclude that the people of that village and vicinity are not behind their neighbors in the march of progress. Tho' a great majority of the large audience there gathered were strangers to us, we are not strangers to the blessings and benefits of the common school. Having been a recipient of its favors, we are now, with thousands of others scattered through this land, a guardian of its interests, a defender of its rights, and an admirer of its votaries. The exhibition was held in the new M. E. Church, which was completely jammed with spectators, among whom the Ladies, gay, smiling and attractive, were thickly and beautifully seated. The building was decorated with wreaths, flower vases, banners, &c., among the latter of which was one bearing the motto now daily illustrated, "Knowledge is Power." The stage, elevated about four feet, was richly carpeted and surrounded by brilliant curtains representing The Seasons, ornamented by appropriate devices and festooned by evergreen; while the "American Flag," broad and unruffled, spread dignity, and decision around each of the juvenile train, as he came forward in succession to make his first bow to the public. The exercises consisted of Essays, Declamations, Recitations, &c., which were all, for the age and experience of the pupil, very creditably delivcred, and showed clearly that with practice and care, many of those Misses will compose with case and elegance, and those Masters need only age and application to place them with the able writers and eloquent speakers of which our country is the home, and our free schools the nursery. Indeed, seldom have we witnessed a more interesting scene, or passed a more agreeable evening, and the whole affair reflected infinite credit on Mr. Clarkson, the gentlemanly teacher of this school. Though youthful in appearance, he is emphatically an "American Schoolmaster," not clad in terror or armed with the huge cudgel that formeriy distinguished the profession, but a modern model whose amicability of temper, thorough scholarship, and complete self command, awakens in the scholar an ambition to obey, and constrains him by kindness to turn with affection to his instructor, whom he at all times regards as a benefactor. Long may such teachers fill our public schools, that our children may be properly instructed, and our community reap the rich reward of their patience, industry and X. wisdom.

NEW SETTLEMENT .- The Philadelphia Erening Bulletin says, a new settlement has been started at Hammonton, New Jersey, which for success and progress rivals anything we have heard of in the West. There is a large emigration having objection to the West on account of unhealthfulness, distance and association, which embraces this new enterprise. The land is in a genial climate, and the soil is said to be amongst the best Jersey soil. Jersey, as will be seen by the agricultural statistics at the Patent Office, is the first agricultural State in the Union for the value of its products. Hammonton is within thirty miles of Philadelphia by railroad, and enjoys one of the best markets in the Union. The tide of emigration to this place is immense, as well from the West as from the North. Many of the best grape grewers of Ohio have located, with a view to making wine. To judge of its progress, the population one year ago is numbered at only five persons; it now numbers over eight hundred souls, has one hundred and twenty-five buildings, three stores, two churches, Episcopal and Methodist, steam mill, brick yard, marble yard, public school, newspaper, &c., some twenty-five miles of new roads opened, six square miles being improved, a new railroad station, and all the elements of an old place. We are satisfied that this place must possess merit from its unparalleled progress.

A CURIOUS CRINOLINE .- We have been shown a section" of patent safety fuse, (a hollow cotten cord filled with a pith of gunpowder, &c..) which was taken out of a ladies skirt, into which it had been sewed as a substitute for crinoline. The skirt was found among some paper rags, purchased by Messrs.
