#### IN A BAD WAY.

Some of our Democratic cotemporaries are just now in a bad fix. They don't know exactly what position to take in the case of "The Little Giant" vs. "The Old Buck." As long as they thought that Mr. Douglas would fail to secure his re-election to the U.S. Senate, a portion of them did not hesitate to denounce him and his siders and abettors in the "anti-Lecompton heresy" in unmeasured terms, whilst others wriggled and twisted around and about the matter until the result of the election should be known. Since then, the latter class have expressed their decided preference for him ; the former, however, are now in a highly interesting state of uncertainty, and, we presume, like Micawber, will wait for something to turn up" to relieve them from their present embarrassing situation. In the meantime they will doubtless try to cultivate more amiable feelings towards Mr. Douglas; in fact, they go so far as to think he deserves credit for the vigorous manner in which he fought the Republicans, though they at the same time regret that he damaged the Administration infinitely more. In this way they attempt to plaster up the sore spots and try to coax him into the Administration fold. The Baltimore Republican-rather a paradoxical name, we should say, for an Administration paper-even presents the terms under which it is willing he shall be reinstated and again "affiliate" with the "faithful." It says ;

"If he shall come back to the Senate and take his place in the ranks of the Democracy. act with them is good faith and kindly feeling, the past may be obliterated, and the "Little Giant' retrieve his character and fully atone for any past errors. But if he shall be found still warring upon the majority, and affiliating with the enemies of Democracy, his claim to be still recognized as a Democrat will hardly be acknowledged by those whose fidelity has never been doubted. We are content to await the future and pass our judgment upon its developments.

We are at a loss to know which to admire ing magnanimity displayed in this proposition

# NE 7 PARTY MOVEMENT.

The Washington Union quotes from a speech delivered by Hon. Henry S. Foote, in Memphis, to show that there is a scheme on the part of certain politicians who call themselves the "True Democracy," to break up the Democratic party. The grand assault is to be made upon the Charleston Presidential nominating Convention. Gen. Foote says :-

"In the first place, it will be impossible for the Democratic convention expected to assemform or candidate, or at any rate no such agreement is probable, except through the employcorrupt and disgraceful character.

"The Douglasites in that body will be conically assertive of the great principle for which eloquently contending. The anti-Democratic stitution can be made operative among a free of their own views.

"Whether the Charleston platform will endorse the Lecompton bill-thus denying the propriety of referring the constitution to the ple of Kansas for approval or rejection-or pholding the English bill, which in a certain abby and ungenteel manner did in point of act submit this same constitution-is a question not easy to be settled. One thing is most certain-the Charleston Convention will not prove a harmonious body ; discord must inevitably prevail. No agreement as to the candidate for the Presidency is even possible, except by the free use of money and the lavish employment of federal patronage."

Gen. Foote then proceeds to predict movements among the people that will overthrow the present organization of the Democratic party. He portrays great chimeras which he assures us are to be overthrown. He has helped himself to prepare the means :

"Federal influence will be restrained within the limits of the Constitution. The myrmidons of caucus will be driven into retirement. the panderers of corruption will be no longer allowed to infest the high places of the nation ; and the fawning sycophantic slaves of lordly, imperial managers will find themselves effectuately deprived of the power to do mischief. Some may suppose this to be the language of extravagance, but indeed it is not, I speak of what I know well. I refer to proceedings with which I stand more or less identified ; I prophecy results the means of achieving which I verily believe to have been already secured."

Something is undoubtedly in the wind, says the Union, and the Democracy should be on the alert.

THE CONTESTED SEATS IN THE NEXT CON-GEESS .- Amos J. Williamson, American, will contest the right of Hon. Daniel E. Sickles, democrat, to represent the third district of New York in the thirty-sixth Congress. Governeur Kemble, democrat, will join issue with North will cease to agitate. We are not dis-Hon. John B. Haskin, anti-Lecompton, in the most-the extreme frigidity, or the astonish- uinth district in that State. John W. Ryan, opposition, denies the claims of Hon. Thom--and we shall watch with interest the "devel- as B. Florence, democrat, to the seat of the opments" of the "future" to see whether Mr. first district of Pennsylvania. Alfred W. Douglas will "retrieve his character and fully Johnson, democrat, will endeavor to show atone for his past errors," in the way indica- that he is better entitled, to speak and vote ted, or whether it may not so happen that the for the third district of Maine than Ezra B. "majority"-"those whose fidelity has never French, republican, who has received the been doubted"-will come over to, and "affil- certificate of election. Francis P. Blair, Jr., iate" with the "little giant." This is an age republican, has announced that he stands reaof strange occurrences, and there is no telling dy to prove that his opponents, J. R. Barrett, democrat, in the first district of Missouri, was elected by fraud, and on that ground he will claim the seat. WHICH IS OUT ?- While the Little Giant of dictator of the little province of Paraguay, is the West was struggling with might and main, to retain his place in Illinois, the President, through his organs, ex-communicated him over to weeping and wailing and gnashing of tecth. But full returns from Illinois, assure barbarous nation, consisting of six hundred us that the Little Giant has come off conquerthousand souls, incapable of insult, and pow- or. The question now is, which is in and which is out of the Democratic party ? They are not together; that is certain. They are es achievements that will surpass even the fa- not both in the same church. Has old Buck turned out the Judge, or the Judge turned out old Buck ?

## A COMMON SENSE SPEECH.

One of the most remarkable public speeches of the day, was that delivered on the 26th Oct. by Senator Hammond, of South Carolina, at Barnwell in that State, upon the present and probable future relations of parties, as affected by the Kansas question, and the question of slavery at large. The Senator utters some pretty plain truths, considering that he was addressing a South Carolina auditory-truths that must, to some extent, undo the popular (Northern) impression, that to be a public man in South Carolina necessarily involves a belief ble in Charleston to agree, either upon a plat- in the principles of nullification and disunion. The Senator commences with a hard kick at that darling measure of the Administration, ment of concentrating agencies of the most | the Kansas-Nebraska Bill, which, he tells us, contained two peculiarly objectionable features-first, that it re-enacted a principle as strained by every honorable and patriotic con- old and as firmly settled as the constitution it sideration to claim an insertion in the platform self-"weakened the whole structure of our of the party of a resolution plainly and emphat- government by digging up, for the purpose of verification, its foundation ;" and, second, the their illustrious leader is now so fearlessly and repeal of the Missouri Compromise ; adding, that this sibill, magnified and exaggerated by candidates of that body, who believe that a con- orators and newspapers into a great Southern victory, led the South into the delusion that people in opposition to their own will, will of Kansas might be made a Slave State, and inourse contend for an insertion of a resolu- duced it to join in a false and useless issue, tion in the platform of the party declarative which has kept the whole country in termoil for the last four years, and gave fresh life and vigor to the abolition party."

The Lecompton Constitution is next handled without gloves. Mr. Hammond, on this point, is peculiarly emphatic, and in speaking of it he uses pretty plain English. He thinks the Southern Members ought to have kicked it out of Congress.

In regard to the admission of Kansas as a State, the Senator says he is in favor of letting her into the Union when she has the requisite population-but not before. And then, as to the dream of Southern politicians and Southern statesmen, that it is possible to maintain an equilibrium of power in the Federal Government, with the Free States, Mr. Hammond talks as if he had for it but very little respect. He thinks the possibility of recovering the political power which the Slave States have lost-both in the Senate and House of Representatives-is, to say the least of it, remote ;" while the notion of increasing the population of the South by the re-opening of the Slave Trade, he tells his friends must be abandoned-the Southern States themselves being divided on that policy, and the Northern States unanimously opposed to it.

The Senator next proceeds to show that there is, in fact, no available territory left, on this continent, from which new Slave States could be advantageousiv carved. He is also opposed to medling with Cuba, which Mr. Caloun called "forbidden truit,"-and from the matured opinions of that statesman, "whether or Constitutional principles or Southern policy," Mr. Hammond thinks "it will rarely be found safe to depart." The acquisition of that island, he thinks, would eventually weaken; not strengthen, the Slave States. In regard to secession from the Union, he thinks a day possibly may come when the South will have to look that contingency full in the face ;

but that time is not yet. In conclusion the Senator counsels the cultivation of a friendly understanding with the people of the Free States. Here all conservative men of the North are ready to meet him. Let the South cease its aggressions, and the posed to wage war upon Slavery as it exists her husband, late in the evening, life was exunder the Constitution. While it keeps within its prescribed limits it should not-and will not so far as we are concerned-be molested But when the Slave Power encroaches, the Station started to school ou Saturday morning, mass of the people of the free North will resist it, as it has been resisted in the infamous attempt to put the yoke of Slavery upon the necks of the free citizens of Kansas .- Tel.

#### TUNNEL THROUGH THE ALPS. The giant undertaking of tunneling Mount

Alps between Switzerland and Piedmont, progresses slowly. The difficulties of the enterprise consist not so much in the length of the der, when by some means it gave away and subterranean communication which is to be effected, as in the impossibility of taking the work in hand at more than two points, and of gotting the necessary supplies of air, at a dis-Union township, while in the act of devouring innee of 10,750 feet from either end of the tunnel. All the other tunnels, which have been built, are connected with the surface by years. . . . The German Reformed church in a series of shafts, which being sunk in distance of at most 1000 feet, do not only multiply the point of attack, but facilitate and insure also the necessary circulation of the air and the emulation of the workmen. This expedient cannot be made use of at the Mount Cenis Tunnel, for the shafts would have to be driven to a depth of 3000 feet to reach the bottom, and the auxiliary works would have to be almost more gigantic than the principal structure. Shafts of that depth have not yet been sunk in rock in any other locality-let alone the regions of eternal snow. Under these circumstances the tunnel is only worked from the two extremities; but though angurs left in his care, and is subject to our order. WILLIAMS & HUMPHREY. of a new invention enable them to drill blasting bores of quite a consinerable depth, in which the powder is fired by electrical sparks, it has not been possible to complete more than 25 to 30 feet per month, even under the most favorable circumstances. At this rate it will take fifty years to finish the work even without considering that the difficulties increase with every step it advances, as the necessary supplies of air, provisions, tools and workmen will at last have to be forwarded over a distance of 18,000 feet from the entrance.
