Last Sunday, snow to the depth of several inches fell in this section of country, and the atmosphere growing cold, and remaining so ever since, we have been in the enjoyment of quite a "spell" of winter weather.

By Divine Permission, a protracted meeting will commence in the Baptist Church in Clearfield on Thursday evening, December 1st. Rev. T. Van Scoyoe will be present, and other ministers are expected. [Nov. 16.

Rt. Rev. Samuel Bowman, Bishop of the Diocese, will preach in the Episcopal church, Clearfield, on Saturday evening the 19th at 61 o'clock, and on Sunday the 20th inst. at 11 o'clock A. M., and 63 o'clock P. M. The right of confirmation will be administered on Sunday at 11 o'clock A. M. [Nev. 2.

A physician cantions ladies against wearing tight garters, saying that he has had a very severe case of varicose veins of the foot and leg of a lady, caused by her wearing garters so tight as to make a furrow around her limb from one-eighth to one-fourth of an inch in depth. He says that garters should be worn as loose as possible, only just tight enough to support the stocking.

Boots are said to have been invented by the Carians. They were at first made of leather, afterwards of brass or iron, and were proof against both rust or cut. It was from this that Homer called the Greeks brazen-footed. Formerly, in France, a great foot was much esteemed, and the length of the shoe in the fourteenth century was a mark of distinction. The shoes of a prince were two feet and a half long; those of a baron two feet; those of a knight eighteen inches long. The trouble now-a-days is to get them short enough.

The Journal de Constantinople gives an account of a curious religious ceremony which has just taken place in that city. It is the reception by the Sultan of the golden gutter in which is collected the rain that falls upon the temple of Mecca, and which thenceforward is considered by the Musselmans as holy water. This gutter has been carried from Mecca, and received by the Sultan with pompous ceremonies. It has been placed in the old palace at Constantinople, where the arms, flags and other memorials of Mohammed are carefully

A Mormon is a living paradox. He says grace before a cotillion, swears in his sermons, selects his texts indifferently from the Bible, the Books of Mormon, an almanac or the Presfor the sake of peace. His religion is a joke, and he makes the best story teller a chief of the quorum. He assumes dignities, but has not the slightest respect for them; and the effeet of his piety is to put him on a level with the greatest reprobate of the time. In short, be is the Latter Day Saint, or, in other words, the last one you would think of calling a saint.

The Icelanders have a most curious custom, and a most effectual one, of preventing horses from straying, which is believed, is entirely peculiar to this island. Two gentlemen, for instance, are riding together without attendants; and wishing to alight for the purpose of visiting some objects at a distance from the road, they tie the head of one horse to the fail of another, and the head of this to the tail of the former. In this state it is utterly impossible that they can move either backwards or forwards, one pulling the one way and the other the other; and, therefore, if disposed to move at all, it will be only in a circle, and even then, there must be an agreement to turn their heads the same way.

His wife, a tidy woman about his own age, neatly and comfortably dressed, and tastefully hooped, accompanied him. He told us he had been taken captive by the Indians belonging to the tribe of the Six Nations, when a child, and had remained with them until within a few months, when he left to visit his relatives in New Jersey, intending to return to his friends in the far West at an early day. He addressed his wife in the Indian dialect, which she answered in the same language. It will be a long time before they reach their place of destination, if the whole journey be made on foot.

Freedom, charging old John Brown with being, a rather desperate man. Whether the statements of the Herald are worthy of belief, can best be judged from the character of its editor, G. W. SCROFULA, OR KING'S EVIL, is a constitutional disease, a taint, or corruption of the rying on the MARBLE BUSINESS in Belle- | blood, by which this fluid becomes vitiated weak, fonte, in all its various branches, and will hold and poor. Being in the circulation, it pervades himself always in readiness to furnish those who | the whole body, and may burst out in disease on call upon him, with all kinds of Cemetery Work, any part of it. No organ is free from its attacks, of the latest classical designs, and superior work- nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, or disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending from parents "to children unto the third and fourth generation;" indeed it seems to be the rod of Him who says, "I will visit

the iniquities of the fathers upon their children."
It effects commence by deposition from the blood of corrupt and ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which deceminates the human family has its origin directly in this scrofulous contamination, and many destructive diseases of the liver, kidneys, brain, and indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking contamination, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine and invigorate it by healthy food and exercise. Such a medicine we supply in Aver's Compound Extract of Sarsaparit

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Erupgreat variety of LADIES' DRESS GOODS, which | tive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors. The popular belief in "impurito of the blood" is founded in truth, for scrofula is a degeneration of the blood. The practical purpose and virtue of the Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.
