

S. B. ROW, EDITOR AND PROPRIETOR.

CLEARFIELD, PA., JUNE 20, 1860.

FOR PRESIDENT, HON, ABRAHAM LINCOLN, FOR VICE PRESIDENT. HON. HANNIBAL HAMLIN.

FOR GOVERNOR, HON. ANDREW G. CURTIN, of Centre Co.

COL. CURTIN'S PROSPECTS.

During our absence from home the past two weeks, we had an opportunity of conversing with many persons in the western part of the State, and all agreed in the opinion that Col. Curtin's prospects of election are of the most flattering character, if the condition of affairs in that section can be taken as an index to the remainder. In Westmoreland county, where Gen. Foster, the Democratic candidate, resides, he will receive the full party vote, as he will also in the balance of the Congressional district to which that county is attached. We are ever ready to give Gen. Foster all the credit he deserves as a man and citizen; but must insist on it that his friends who regard him as an unusually popular candidate, are greatly mistaken, nor will we be surprised to hear of him being beaten from 15,000 to 20,from keeping constantly at work, and making every honorable exertion to give him a large vote in the eastern part of the State. On the other hand, let it encourage every one to "lay his shoulder to the wheel" and make the victory the more decisive and brilliant, and by doing so secure the State for Lincoln and Hamlin in November.

THE FATE OF THE TARIFF .- The MORRILL tariff bill, says the Pittsburgh Gazette, has met the fate in the Senate which its enemies have all along prophesied for it, and which its friends feared was prophesied too truly. The resolution to extend the session to the 25th, has been adopted, but Mr. Hunter's resolution to postpone the tariff bill until next winter will prevail, by about the same majority as that given for the amendment to the appropriation bill, authorizing a loan of \$20,000,-000 to fund the outstanding Treasury notes. This was a part of the House tariff bill, but Mr. Hunter has managed to tack it on to the civil appropriation bill. The House, of course, will strike it out, in the hope of bringing the Senate to terms; but the Senate will insist, at the risk of losing the appropriation bill altogether. There can be no doubt of the propriety of the course that will probably be followed by the House. If the administration is determined that we shall not have the tariff, it should be denied the power which it seeks of funding the Treasury notes. These notes fall due on the 1st of July, and the Government is without the means to redeem them. Its only recourse is a loan; and the power to make this loan should be peremptorily refused by the House unless the Democratic majority in the Senate concede the tariff bill with it. If the administration will not voluntarily give what is due to the suffering industry of the country, it should be coerced into it. It was with this view that the House incorporated the provision for a loan for funding the Treasury notes in the Tariff bill, and we trust it will insist upon keeping it there. No matter if the appropriation bill does fail. Let the Democratic Senate take the responsibility of its failure and the administration the burden of calling an extra session, and then let the House sit, if need be, until December, determined not to adjourn until the tariff bill is passed.

THE HOMESTEAD BILL .- After several meetings of the Committee of Conference on the disagreeing votes of the Senate and House on the Homestead bill, and a great deal of discussion on the various propositions, the Committee reported that they were utterly unable to agree, and asked for their discharge. Thus ends the matter for the present. The friends of the Homestead bill know upon whom the blame rests. The Republicans of the Senate and House have done their best to secure the passage of this beneficent measure. but the democracy has effectually prevented them. The triumph of Lincoln alone can secure the success of a measure to which the people of the free North are so much attached.

The tornado which recently visited eastern and north western Illinois, was even more destructive than at first reported. At Camanche fifty-five persons were killed, one hundred and twenty-five wounded, and ten are missing; at DeWitt twenty-seven persons were killed; at Union Grove seventeen; at Mechanicsville sixteen, and New Lisbon sixteen, making in all one hundred and thirty-one killed, one hundred and twenty-five wounded, and ten missing. At Lisbon ten heavy laden freight cars were lifted bodily from the track and

MISSOURI .- At the present moment there are eight papers in Missouri with the Lincoln and Hamlin banner flying at the masthead, and we shall be disappointed if, as the day of election approaches, others are not added to the list. The eight papers in question are responsible, well conducted and permanent conLITERARY NOTICE.

One of the most interesting and useful publications which comes to our sanctum is the Scientific American, a weekly publication, devoted to popular science, new inventions, and the whole range of mechanic and manufacturing arts. The Scientific American has been published for fifteen years, by the well-known Patent Solicitors, Messrs. Munn & Co. 37 Park Row, New York; and has yearly increased in interest and circulation, until it has attained, we understand, nearly 30,000 subscribers, which is the best of evidence that the publication is appreciated by the reading public.

To those of our readers who may not be familiar with the character of the paper, we will state some of the subjects of which it treats. Its illustrated descriptions of all the most important improvements in steam and agricultural machinery, will commend it to the Engineer and Farmer, while the new household inventions and shop tools which are illustrated by engravings and described in its columns, with the practical receipts contained in every number, renders the work desirable to housekeepers, and almost indispensable to every mechanic or smith who has a shop for manufacturing new work, or repair-

The Scientific American is universally regarded as the inventor's advocate and monitor; the repository of American inventions, and the great authority on law, and all business connected with Patents. The Official List of Claims, as issued weekly from the Patent Office, in Washington, are published regularly in its columns. All the most important Patents issued by the United States Patent Office are illustrated and described on its pages, thus forming an unrivalled history of Ameri-

It is not only the best, but the largest and cheapest paper devoted to Science, Mechanics, Manufacturers, and the Useful Aarts published in the world. Hon. Judge Mason, formerly Commissioner of Patents, is not only engaged with the publishers in their immense 000 west of the Alleghenics. This, however, Patent Agency department, but as a writer on should not deter the friends of Col. Curtin | Patent Laws and Practice, his ability is forcibly portrayed in the columns of this paper.

The Scientific American is published once week, (every Saturday,) each number containing 16 pages of Letterpress, and from 10 to 12 original Engravings of New Inventions, consisting of the most improved Tools, Engines, Mills, Agricultural Machines and Household Utensils, making 52 numbers in a year, comprising 832 pages, and over 500 Original Engravings, printed on heavy, fine paper, in a form expressly for binding, and all for \$2 per

A New Volume commences on the 1st of July, and we hope a large number of our townsmen will avail themselves of the present opportunity to subscribe. By remitting \$2 by mail to the publishers, Munn & Co. 37 Park Row, New York, they will send you their paper one year, at the end of which time you will have a volume which you would not part with for trable its cost. The publishers express their willingness to mail a single copy of the paper to such as may wish to see it an idea, but, after all, a bargain is a bargain.

The Fillmore papers East and West are rallying to the support of Lincoln and Hamlin. The accessions of the Buffalo Commercial Advertiser and Albany Statesman have already been mentioned. The Evansville (Ind.) Journal thus speaks of itself and others:

"The Vincennes Gazette, the New Albany Tribune, the Fort Wayne Times, and the Evansville Journal, all Fillmore papers in 1856, have come out heartily for Lincoln and Hamlin. The Terre Haute Express, which was a Fillmore paper for a short time in 1856, is now enthusiastically out for the people's ticket. The Greencastle Banner, the Seymour Times, and the Rising Sun Visitor, all Fillmore papers in 1856, will advocate Lincoln. Wm. H. French, Esq., publisher of the Jeffersonville Republican, is a warm Lincoln man, and is going to make his paper a Lincoln and Hamlin paper. So far as we have seen, not one Opthe Chicago ticket! This unanimity is un-

SPAULDING'S PREPARED GLUE WON'T HELP THEM .- In the course of an article on the distracted condition of the Democratic party, and the objects of the Baltimore and Richgets off the following :-

"No matter what the result, though, it is evident that the National Democratic party, North and South, can never again be united upon principles so long as present political velops a wider divergence between the two wings, as Senator Clay, of Alabama, has shown in a recent letter, not only in regard to the question of slavery in the Territories, but alnost every other question of public interest. The may come together for this canvass, in a ast attempt to preserve a mere national organso far as principles are concerned, even the magic virtues of 'Spaulding's Prepared Glue' can never remaite the diverse and antagonis-

How to DESTROY CATERPILLARS ON TREES. A correspondent of one of our Agricultural exchanges describes the mode by which he kills caterpillars on trees. We give it for the benefit of owners of ornamental shade and fruit trees in our town : "Take a small augur, say 1 inch to 1, according to the size of your trees, bore a hole in the trunk of a tree, and fill with flour of sulphur, then plug up the hole with a soft wood plug. The sulphur circulates through the pores by means of the sap, into the leaves-the caterpillars cat the leaves, which causes almost instant death. I have tried the above remedy, and have seen it tried more than a hundred times, and never knew it to fail in a single instance."

the city fathers would make a good well, where known. A few days after three more negroe

A VOTE OF CENSURE.

The House of Representatives at Washing. ton, on Wednesday a week passed a series of resolutions which we annex, censuring the President and Secretary of the Navy in severe terms. These resolutions were reported last year by the Committee on Public expenditure, laid over and taken up a few days since. They were adopted by the large vote of one hundred and nineteen to sixty:

Resolved, That the Secretary of the Navy has, with the sanction of the President, abused the discretionary power in the selection of a coal agent, and in the purchase of fuel for the Government.

Secretary of the Navy, under date of September 23, 1858, with William C. N. Swift, for the delivery of live oak timber, was made in violation of law, and in a manner unusual, improper and injurious to the public service. Resolved, That the distribution, by the Secretary of the Navy, of the patronage in the navy yards among members of Congress, was destructive of discipline, corrupting in its in-

Resolved, That the contract made by the

service. Resolved, That the President and Secretary of the Navy, by receiving and considering the party relations of bidders for contracts with the United States, and the effect of awarding contracts upon pending elections, have set an example dangerous to the public safety, and deserving the reproof of this House.

fluence, and highly injurious to the public

Resolved, That the appointment, by the Secretary of the Navy, of Daniel B. Martin, chief engineer, as a member of the board of engineers to report upon proposals for constructing machinery for the United States, the said Martin at that time being pecuniarily interested in some of said proposals, is hereby censured by this House.

Another Fiendish Outrage .- On Wednesday afternoon of last week, a Mrs. Mills, wife of Mr. James Mills, who resides about four miles from Ebensburg, while returning home on horseback from a visit to her mother, was overtaken on a by-road by a man named Samuel Welsh, dragged from her horse and brutally outraged. Welsh is a peddler of earthenware, glass, &c., from Allegheny City, and had gone to Ebensburg to procure a license permitting him to prosecute his business within the limits of this county. Information of the outrage was speedily made before a Justice in Ebensburg, a warrant issued and placed in the hands of officer Gageby of this Borough, who, in company with Mr. John P. Jones, of Ebensburg, came to Johnstown that night, and arrested the fellow early the next morning in his boat. He was returned to Ebensburg and lodged in jail. An indictment was immediately laid before the Grand Jury, who found a true bill against him upon the charge of rape. His trial has been deferred until next term .- Cambria Tribune.

The Emperor of the French is said to be more and more dissatisfied with the Piedmontese, who, his majesty seems to believe, are (to use a vulgar phrase) "coming the old soldier over him." When Savoy was to be handed over to France it is clear that it was not the Savoyards who have been converted into French citizens that were meant, but something quite as valuable-namely, the land that bore them. Now, it is very well to fight for The Piedmontese do not appear to have as good a notion of this elementary maxim as people at the Tuilleries, and the former have employed the interval before the ratification of the treaty in selling, as fast as they can, and to the highest bidder, not merely the personal property of Victor Emanuel, but the Crown lands which should revert to France. This is rather sharp practice. France, doubtless, glories in her new subjects, but if they bring nothing with them there will be matter

A REPROOF FROM THE ANTIPODES .- The Polynesian, published at Honolulu, copies into its columns an account of a tragedy not long since enacted in one of our Southwestern Courts, and warns its readers against lapsing into similar barbarism. It discourses very seposition paper in Indiana has failed to hoist riously upon the state of society which prevails in the United States, and rejoices in the fact that murder is of comparatively rare occurrence in Oahu. This voice from the Antipodes should not be disregarded. Some years since we sent out missionaries to Christianize the Sandwich Islanders; if they, in turn, find mond conventions, the New Orleans Crescent | it necessary to send emissaries to civilize us, it augurs very little for the progressive state of morals in this quarter of the globe. It is not at all unlikely that the next missionary we send to the Feejee Islands will rebound. Anissues are before the people. Every day de- other century may see tattoed Evangelists admonishing us of the evil of our ways, and urging us to repentance.

A VALUABLE Log .- Recently the administrators of Elisha Harris, dec'd, late a resident of Luzerne county, offered his effects at sale, ization, without respect to anything else-but, among them an uncouth block of wood, supposed to be a part of a cheese press, and which was purchased for 15 cents by David Hatmacher. On the morning succeeding the sale, the purchaser, in a spirit of inquiry, "characteristic of the age we live in," split the block open, when he discovered a queer secret drawer, opened by the pressure of a long rod, and contained bonds, notes and other matters, besides about \$2,000 in silver coin. To test the right of ownership in the treasure, and micable suit for its recovery was instituted in the Common Pleas of Luzerne county, resulting in a verdict for the execu-

SHOCKING TRAGEDY IN TEXAS .- The Hopkins Monitor has a lengthy account of a terrible tragedy in Grayson county, near Kentuckytown, where a man named Kincade whipped his negro boy. That same night the negro killed the entire family with an axe-first his Topeka, in Kansas, is a very thirsty town. | master, then his mistress, then an orphan boy A late number of the paper publishes the and a little babe. The negro then confessed wonderful intelligence that "the old well" in his guilt, was tried and hung. Several white that place had "gin cout!" and adds that if men were implicated, but nothing definite is all could be accommodated, "water would were hung as implicated in the murder. The soon be as cheap as whiskey, and a great many bodies of the negroes were not suffered to be lets pierced his ragged garments at Montevibe induced to use it as a beverage!!" From which we infer that water, in Topeka, is not relied upon as "a steady drink." bodies of the negroes were not suffered to be lets pierced his ragged garments at Monteviremoved from the trees, but will hang there as warnings to others.

LINCOLN ON SNAKES.

The following is one of Lincoln's illustrations, made in a speech at New Haven, Conn. Speaking of the right and wrong of slavery he

"The other policy is one that squares with the idea that slavery is wrong, and It consists in doing everything that we ought to do if it is wrong. Now I don't wish to be misunderstood, nor to leave a gap down to be misrepresented, even. I don't say that we ought to attack it where it exists. To me it seems that if we were to form a government anew, in view of the actual presence of slavery, we should find it necessary to frame just such a government as our fathers did, giving to the slaveholders the entire control where the system is established, while we possessed the power to restrain it from going outside those limits. [Applause.] From the necessities of the case, we should be compelled to form just such a government as our blessed fathers gave us; and, surely, if they have so made it, that is another reason why we should let slavery alone where it exists.

"If I saw a venomous snake crawling in the road, any man would say I might seize the nearest stick and kill it; but, if I found that snake in bed with my children, it would be another qustion. [Laughter.] I might hurt the children more than the snake, and the snake might bite them. [Applause.] Much more, if I found it in bed with my neighbor's children, and I had bound myself by a solemn compact not to meddle with his children under any circumstances, it would become me to let that particular mode of killing the gentleman alone. [Great Laughter.] But if there is a bed newly made up, to which the children are to be taken, and it was proposed to take a batch of young snakes and put them in with them, I take it, no man would say there was a question how I ought to decide. That is just the case! The new Territories are the newly made bed to which our children are to go, and it lies with the nation to say whether they shall have snakes mixed up with them or not. It does not seem as if there could be much hesitation what our policy should be. [Applause.

John Mitchel has written a letter in which he states that "for three years I have been laboring in my sphere of journalism to break up the Democratic party." "It is impossible any longer to belong to a party which is dead and gone, the soul having gone out of it, and the very body torn limb from limb. If I had any credit with my fellow-countrymen, I should exhort them to seek new combinations-to isolate themselves no longer as the Irish vote -to merge in the several organizations of their fellow citizens, and be guided in all public affairs by their own views of right and the political interests of the community in which they live. For example, I should wish to see Irish citizens of Northern States acting with the party which desires a protective tariff for home industry, and also the largest possible extent of territory for the field of free labor. If the South feel aggrieved-as she well may, she has her remedy."

LINCOLN IN THE SOUTH .- However much opposed the Slave States may be to certain planks in the Chicago Platform. many of the papers there speak of the nomination of Mr. Lincoln in just and kindly terms. They regard him as an old line Whig-a disciple of Henry Clay-and as a man of conservative views upon the agitating question of the day. They also admit his ability and honesty. This is more than might have been expected in that quarter on any nominations that could have been made at Chicago, and savors of a re-assurance on the part of the right thinking people in the South as to friendly feeling hitherward. It would seem that the Chicago Convention made no mistake in its nominations.

A NICE POINT .- It is a nice point to decide exactly when a "girl" becomes a "young lady." In a suit in Schoharie county lately, the cause turned upon the point whether the defendant's daughter was a child, entitled to be boarded at half price, or a full grown specimen of the female article, competent to have the "question popped" at her, and to faint away at an affirmative response. It is now settled that a young lady is any delicate individual of the feminine gender who will not touch onions stewed in butter, or eat nice boiled cabbage. This great principle, which must forever settle the question, was promulgated by a knowing witness on the trial refer-

A NEW DISCOVERY .- A Western paper commenting upon the "oil discoveries" in Western Pennsylvania, states that a man living on Sugar Creek, Ohio, discovered a molasses mine while in search of oil. "At the depth of sixty feet," says the fortunate discoverer, "the drill penetrated a hard substance which appeared like sugar. It was thirty feet through this, when, on extricating the drill, the molasses gushed forth in great quantities." The planters of the South might dissolve the Union if they knew how their traffic in this article was threatened with annihilation by the discovery of an Ohio Yankee. It would be worse than a tariff discriminating against cotton.

REMARKABLE FATALITY .- During the shower on Wednesday afternoon, says the Newport, N. H., Republican, the lightning struck the house occupied by Mrs. Ebenezer Hazleton, in Sunapee. Mrs. H. was standing near the stove, when the lightning struck the chimney, descended, split the stove in pieces, and instantly killed Mrs. Hazleton. She was about 95 years of age. Six years ago a son of hers was killed on the Fitchburg Railroad, soon after a nephew was drowned, five years ago her husband took
