Your country, although calling for your exertions, does not wish you to engage in her cause without renumerating you for the servi ces rendered. Two years ago she had an at-tack of acute rheumatism, from which she was con-fined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till last Saturday; while engaged in since then the last Saturday, while engaged in house cleaning, she took cold, had pain in her back felt cold, but had no decided chill. This, then, is a case of acute rheumatism, or as it is now fashionably called, rheumatic fever. It is a well marked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselve. My chief object in bringing her before you now is to call your attention to a remedy which has pe cently been recommended in the treatment of these matism. I mean propylamine. Dr. Awenarius of St. Petersburg, recommends it in the highest term having derived great benefit from its use in Sa cases which came under his care. Various canmendatory testimonials respecting it have appeared in our journals, and I propose giving it another trial. I must confess I am always incredulous as to the worth of new remedies, which are vaunted as specifies ; but this comes to us recommended as highly, that we are bound to give it a trial.
