

CLEARFIELD, NOV. 12, 1862.

Mr. Corcoran, the great Washington banker, before leaving for Europe, purchased one million six hundred thousand dollars in gold. Mr. Corcoran made this money out of our country, and then left it disgraced with the institution under which all his prosperity was attained.

ILLUSTRATED SCIENTIFIC AMERICAN.—The Best Mechanical Paper in the

World.—SEVENTEENTH YEAR.—VOLUME VI.—NEW SERIES.

A new volume of this widely-circulated paper commences on the first of January. It is published weekly, and every number contains sixteen pages of useful information, and from five to ten original engravings of new inventions and discoveries, all of which are prepared expressly for its columns.

TO THE MECHANICS AND MANUFACTURERS.—No person engaged in any of the mechanical or manufacturing pursuits should think of "doing without" the SCIENTIFIC AMERICAN. It costs but four cents per week; every number contains from six to ten engravings of new machines and inventions, which are not found in any other publication. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their own supervision.

TO THE INVENTOR.—The Scientific American is indispensable to every inventor, as it not only contains all the latest and most successful inventions, but also publishes them, and thus secures for the inventor a permanent record of his discovery. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their own supervision.
