NO. 2. WAKE UP !- The undersigned would respectfully inform the citizens of Clearfield and vicinity, that he continues to do all kinds of Blacksmithing on short notice and in the very best style, at the Oid Shop alongside of the Town Hall. Edge tools of all kinds made and dressed in the best manner, and warranted to give entire satisfaction. The public will remember, that I am not in the habit of turning off jobs on account of not being able to do them. All I ask is a trial, and then the public may judge of the work for themselves. Remember the "Old Shop" at the Town Hall. JAMES HAFF. Clearfield Pa, August 13, 1861. N. B. Any jobs that Mr. Passmore cannot exe-cute, will be done on very short notice.

ILLUSTRATED SCIENTIFIC AMERI-CAN.-THE BEST MECHANICAL PAPER IN THE WORLD.-SEVENTEENTH YEAR.-VOLUME VI-NEW SERIES.

A new volume of this widely-circulated paper commences on the first of January. It is pub-lished weekly, and every number contains sixteen pages of useful information, and from five to ten original engravings of new inventions and dis-coveries, all of which are prepared expressly for

TO THE MECHANICS AND MANUFACTURERS .- NO person engaged in any of the mechanical or man-ufacturing pursuits should think of doing with-out" the SCIENTIFIC AMERICAN. It costs but four cents per week ; every number contains from six to ten engravings of new muchines and inventions, which are not found in any other publica tion. It is an established rule of the publishers to insert none but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their own super-vision.

To THE ISVENTOR -The Scientific American is indispensible to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official List of the Claims of all the Patents issued from the United States Patent Office during the previous week ; thus giving a correct history of the progress of inventions in this country. We are also receiving every week, the best scientific journals of Great Britain. France and Germany; thus placing in our posession all that is transpiring in mechanical science and art in these old countries. We shall continue to trans-fer to our columns copious extracts from these journals of whatever we may deem of interest to our readers.

CHEMISTS, ARCHITECTS, WILLWRIGHTS, AND FAR-MERS -The Scientific American will be found a most useful journal to them. All the new discoveries in the science of chemistry are given in its columns, and the interests of the architect and carpenter are not overlooked ; all the new inventions and discoveries appertaining to these pursuits being published from week to week. Useful and practical information pertaining to the interes's of millwrights and mill owners will be found published in the Scientific American, which in-formation they can not possibly obtain from any other source. Subjects in which planters and farmers are interested will be found discussed in the Scientific American; most of the improvements in agricultural impliments being illustrated in its columns.

Pen sylvania Hoapital. (FROM OFFICIAL HOSPITAL REPORTS ) MAY 19, 1860.-Ellen S., et. 28, single, never was very strong. Two years ago she had an at-tack of acute rheumatism, from which she was confined to her bed for two weeks. and subsequently fined to her bed for two weeks, and subsequently from a relapse for four more. She has been well since then till last Saturday; while engaged in house cleaning, she took cold, had pain in her back, felt cold, but had no decided chill. Two days later her ankles began to swell which was follow-ed by swelling of the knee joints and of the hands. She has dull pain in her shoulders, and her knuck-les are very tender, red and painful; both hands are affected, but the right is the most so. This then, is a case of acute rheumatism, or as it is now then. is a case of acute rheumatism. or, as it is now fashionably called. rhoumstic fever. It is a well marked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her before you now is to call your attention to a remedy which has recently been recommended in the treatment of rheu-matism. I mean propylamicas. Dr. Awenarius of St. Petersburg, recommends it in the highest terms having derived great benefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appear ed in our journals, and I propose giving it another trial. I must confess I am always incredulous as to the worth of new remedies, which are vaunted as specifics ; but this comes to us recommended so

highly, that we are bound to give it a trial.

MAY 23, 1860 .- I will now exhibit to you the patient for whom I preshribed Propylamine, and who was then laboring under an attack of acute rheumatism. She has steadily taken it in does of three grains, every two hours, (intermitting it at night). The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room. The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are now nearly of their natural size. Thus far our experiment would have seemed very successful; but gentlemen we must wait a little while before we can give a deeided opinion as to what is to be the result.

THREE DAYS LATER !!

MAY 26, 1860 .- This is the case of acute rhenmatism treated with propylamine, the first of those to which I called your attention at our last clinic.

Justice and Freedom, enderw oring o meliorate the condition of the oppressed unfortunate, to honor and encourage useful exert on in whatever sphere, and, to promote by al means the moral, intellectual and material advancement of our country. It has aimed to be right rather than popular, and to espouse and commend to day the truth that others may not be willing to accept till to-morrow. In pursuing this course, mistakes have doubtless been made and faults committed ; but, having in all things incited our readers to think and judge for them-selves rather than adopt blindly our own or others' conclusions, we believe we may fairly claim for this journal the credit of having qualified its readers to detect and expose oven its own errors. To develop 'he minds of the young by the most general, thorough and practical Education, and to encourage and stimulate Productive Industry, through free grants of Public Lands to actual set-tlers and cultivators. as also through the protection of immature or peculiarly exposed branches from too powerful foreign competition, are among the aims to which this journal has adhered through good and evil report, and which it stead-fastly commends to American patriotism and philanthropy. As to the Civil War now devastating our coun-

try, we hold it to have originated in a Rebellion more wanton, wicked, inexcusable, then was ever before known-a Rebellion in the interest of the few against the many-a Rebellion designed to raise higher the walls of caste and tighten the chains of oppression. Having done all we could without a surrender of vital principle to avoid this War and witnessed the forbearance, meek ness, and long-suffering with which the Federal Government sought to avert its horrors, we hold it our clear duty, with that of every other citizen to stand by the nation and its fairly chosen ru lers, and to second with all our energies their of forts to uphold the Union, the Constitution, and the supremacy of the laws. And, though the Rebellion has become, through usurpation, deception. terroism, and spoilation, fearfully strong, we be-lieve the American Republic far stronger, and that the unanimous, earnest efforts of loyal hearts and hands will insure its overthrow. But on all questions affecting the objects, the scope. and duration of this most extraordinary contest, we defer to those whom the American People have clothed with authority, holding unity of purpose and of action indispensable in so grave an emergency

In a crisis like the present, our columns must be largely engrossed with the eurrent history of the War for the Union, and with elucidations of its more striking incidents. We shall not, however. remit that attention to Literature, to Forever. remit that attention to Interature, to ror-eign Affairs to Agricultural Progress, to Crops. Markets, &c., which has already, we trust, won for THE TRIBUNE an honorable position among its cotemporaries. Our main object is and shall be to produce a comprehensive newspaper, from which a conful moder may glean a vivid and which a careful reader may glean a vivid and faithful history of the times, not merely in the do-main of Action but in that of Opinion also. As our facilities for acquiring information increase with years, we trust that an improvement in the contents of our journal is perceptible, and that, in the variety and fulness of intelligence afforded. we may still hope to 'make each day a critic on the last." In this hope, we solicit a continu ance of the generous measure of patronage hith-erto accorded to our journal. TERMS.

### LINDSEY'S

BLOOD SEARCHER.

In renewing of my acquaintance with the many friends of my medleine. I deem it proper to cau-

### tion them and the public, generally, against the use of an article prepared and sold by a man calling himself "Geo. H. Keyser, Pittsbury, Pa.," who

has the impudence to call it LINDSEY'S IMPROVED BLOOD SEARCHER.

and states that it is made from my recipe, and, as if to carry out a regular game of "Stop Thief." he tells the public that "there is a counterfeit in the market. to see that his name is over the cork of every bottle" &c. He also publishes the most extravagant certificate headed "A Blind Man Cured"-"A Bad Sore Leg Cured," &c. I allowed him to proceed in this way for nearly twelve months, knowing that those who had either used or sold my article would have nothing to do with his, but I found there was a number unacquainted with mine who were induced from the above statements to give his a trial The consequence was disappointment to them and injury to me. as they would at once pronounce Lindsey's Blood Scarcher a humbug, without knowing that mane

tifal as ortments of all kinds and qualities of fan-cy furs, for Ladies' and She is still very comfortable, and is now taking three gratns thrice doily. In this case it has seemed to be followed by very

satistactory results The second case to which your attention was called at our last lecture, has also continued to do well. I will now bring > e fore you a very characteristic case of acute rheu-matism, and if the result be satisfactory, I think first of August. as good jurymen. we shall justly render our von... lasts, I will offer it at prices proportionate to what the goods cost me; but, it will be impossible in favor of propylamine.

He is a seaman, at. 26, who was admitted a few days ago. Has had occasional rheumatic pains. but not so as to keep his bed. until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later the joints of the upper extremities. These joints are all swollen, tense and tender. His tongue is furred; his skin at present. dry, though there has been much swentiug. His pulse is full and strong, and about 90 He has now used propylamine twenty-four hours.

This gentlemen is what may be called a strictly typical case of acute rheumatism. There was ex-posure to cold and wet, and this exposure is fol-

lowed by a feeling of coldness. severe articular pain, beginning, as it usually does, in the lower joints There is fever and the profuse sweating, so generally attendant on acute rheumatism.

I did not bring this patient before you with the intention of giving you a lecture on all the points connected with rheamatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it. than which there could not be a fairer opportunity for testing the medicine in question. We are therefore, avoiding the use of all other medicines. even anodynes, that there may be no misgivings as to which was the efficient remedy. You shall see the case in a future clinic.

THE RESULT .-- A FAVORABLE VERDICT. JUNE 9, 1860 .- The next of our canvalescents is the case of acuterheumatism before you at our clin-ic of May 26th, which I then called a typical case. and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The ratient has got along very nicely, and is now able to walk about as you see. I do not hesitate to say that I have never seen

as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positively as to the value of the remedy we have used. I feel bound to state that in the cases in which we have tried the chloride of Propylamine. the patients have gained their health much earlier than under the treatment ordinarily pursued. I wish. gentlemen, you would your

selves try it, and report the results. For a full report of which the above is a cen lensed extract, see the Philadelphia Medicaland Surgical Reporter. It is a report after a fair trial by the best medical authority in this country, and makes it unnecessary to give numerous certificates from astonished doctors and rejoicing patients,
