the loved of many fond hearts. Possessed of that amiable spirit which dispels sadness and lightens the sorrows of life, she early became prized in every circle of which she formed a part. Short as has been her stay amid the sunshine and shadows of this life, she will not be forgotten ; for so sacred and endearing is the impress of true womanly character, when its first genial rays cast their inspiring luster upon the associations of earth, that it requires not length of years to assimilate the record with the pure and infinite. To contemplate such a life, as we connect it with the great future, is to elevate and ennoble the friendships of our sojourn here. But we need not regret that she has In beauty of design and artistic execution left this world of care and sorrow for one where affliction and death can never more assail. To mourning friends she left the comforting assurance that she did not fear to bid adieu to earth, and though sorrow EDUCATIONAL -In another column of may darken their way in the future, and they may bitterly weep as often as they meet the places made vacant by the loss of their cherished one, yet this testimony will loom up before them as a bright star, ever pointing them through the dark clouds of the future to her happier and better home.

The kidneys are two in number, sit-

uated at the upper part of the loin, surrounded by fat, and consisting of three parts, viz: the anterior, the interior, and the exterior.

The anterior absorbs; the interior consists of tissues or veins, which serve as a deposit for the urine, and convey it to the exterior; the exterior is a conductor also, terminating in a single tute. and called the ureter; the ureters are connected with the bladder.

The bladder is composed of various coverings or tissues, divided into parts. viz: the upper, the lower the nervous, and the mucous. The upper expels, the lower retains. Many have a desire to urinate without the ability, others arinate without the ability to retain. This frequently occurs in children

To cure these affections we must bring into action the muscles, which are engaged in their various functions. If they are neglected Gravel and Dropsy may ensue.

The reader must also be made aware that, however slight may be the attack, it is sure to affect his bodily health and mental powers, as our flesh and blood are supported from these sources.

Gout, or Rheumatism.

Pain occurring in the loins is indicative of the above diseases. They occur in per-sons disposed to acid stomach and chalky secre tions.

The Gravel.

The Gravel ensues from neglect or the improper treatment of the kidneys. These organs being weak, the water is not expelled from the bladder, but allowed to remain ; it becomes feverish and sediment forms. It is from this deposit that the stone is formed and Gravel ensues

DROPSY

Is a collection of water in some parts of the body, and bears different names, according to the part affected, viz: when generally diffused over the body, it is called Anasarca; when of the abdomen, Ascites; when of the cheat, Hydrothorax

TREATMENT.

Helmbold's highly concentrated Extract of Buchu is decidedly one of the best remedies for disenses of the bladder, kidneys, gravel, dropsical swellings, rheumatism, and gouty affections. Under this head we have arranged Dysuria, or difficulty and pain in passing water; Scanty secretion, or small and frequent discharges of water: Stranguary, or stopping of water; Hæmaturia, or bloody urine; Gout and Rhematism of the kidneys, without any change in quantity, but increase of color or dark water It was always highly recommended by the late Dr Physick in these affections.

This medicine increases the power of digestion, and excites the absorbents into healthy exercise, by which the watery or calcareous depositions and all unnatural enlargements, as well as pain and inflamation, are reduced, and is taken by

THE PIC-NIC .- On Friday last, May 25th, the pic nic. gotten up under the auspices of Rev. P. L. Harrison, the Principal of the Academy, came off at Cabin Spring, about a mile distant from this place. At 10 clock the scholars connected with that institution, accompanied by the principal and his assistants, proceeded to the place desigtated, and soon hilarity and joy reigned suthe children rendering the forest ical with their merry laugh and cheerful fong, whilst engaged in the various innocent amusements pertinent to the occasion. At about 1 o'clock the good things, which had been prepared and sent thither by kind parents and friends, were spread upon a table and the children invited to regale themselves, and we have the pleasure of saying they done the subject ample justice ;' after which the older persons present also artook of the refreshments-there being a

wabundance for all. It was truly a thing of the kind heretofore witnessed by any-thing of the kind heretofore witnessed by us, and all who contributed thereto deserve great praise for their liberality in providing magnificent collation, unsurpassed by anyto sumptuously for the occasion. The dinevening approached, the party wended its way homeward, where all arrived safely, and well pleased-nothing having occurred a mar the enjoyments of the day.

H. T. HELMBOLD, Druggist : Dear Sir :-- I have been a suffer-

er, for upwards of twenty years, with gravel, bladder, and kidney affections. during which time I have used various medicinal preparationS, and been under the treatment of the most eminent physicians, experiencing but little relief.

Having seen your preparations extensively advertised. I consulted with my family physician in regard to using your Extract Buchu.

I did this because I used all kinds of advertised remedies, and had found them worthless. and some quite injurious; in fact, I despaired of ever getting well, and determin-ed to use no remedies unless I knew of the ingre-dients. It was this that prompted me to use your As you advertised that it was composremedy ed of BUCHU, CUBEBS, and JUNIPER BERRIES, it occurred to me and my physician as an excellent combination, and, with his advice, after an examination of the article, and consulting again with the druggist. I conculuded to try it. I commenced its use about eightmonths ago, at which time I was confined to my room. From the first bot-tle I was astonished and gratified at the beneficial effect, and arter using it three weeks, was able to walk out. I felt much like writing you a full statement of my case at the time, but thought my improvement might only be temporary and therefore concluded to defer and see if it would effect a perfect cure, knowing then it would be of g reater value to you und more satisfactory to me

I am now able to report that a cure is effected after using the remedy for five months.

I have not used any now for three months, and feel as well in all respects as I ever did.

Your Buchu being devoid of any unpleasant taste and odor, a nice tonic and invigorator of the ystem. I do not mean to be without it whet ever occasion may require its use in such affections M. M'CORMICK
