Address Deacon & Peerson, 319 Walnut street, Phil'a.

THE PRICE OF FLOUR. - Recently there as been a heavy advance in the price of bur, without any apparently good cause, and it is believed to be the result of the opcrations of speculators. According to the ficial report from the Agricultural Bureau, the harvest of 1866 is, if anything, somewhat above the average yield. In England he harvest has suffered greatly from the continued wet weather. but as the supply of wheat in Russia and Poland is larger than n former years, it is believed the deficiency a England will be made up from those countries. Ireland has a greater yield than mal. This would seem to strengthen the dea that the advance of breadstuffs in the United States is caused by speculation, and not from a deficiency in the supply.

"THE AMERICAN CONFLICT. -The Second rolume of this admirable work, by Horace Greely, is now out, and is being furnished e agents, for delivery to subscribers, as peedily as possible. Mr. P. Antes, the gent for this county, will deliver the second dume as soon as he can be supplied by the ablishers. It may be well enough to state, hat the first volume was furnished to most f the subscribers in this county, at a less rate than the second volume can be. For ustance; the old price of Library style was 84 and the present price is \$5-the differnee in cost being on account of the addition of 182 extra pages and the advance in the price of paper. We hope, however, that no one will fail to procure the second volon account of this trifling additional

A splendid opportunity for a secure and mod-erate investment of capital is now offered by this company to Tanners and Capitalists of large as well as moderate means, as the company is now prepared, after a successful test of Hickel's im-proved system of tanning in several yards of this proved system of tanning in several yards of this county, and adjoining counties, to offer for sale some territory within this State, Tennessee, Texas, Oregon. Utah, New Mexico and Nevada, in the shape of rights for districts, counties, towns, or for individual use of said improved system, secured to Sanford A. Hickel. Esq., by Letters Patent, dated Nov. 7th. 1865, and granted for seventeen years, and by said S. A. Hickel Esq., legally transferred to this compuny for this and the other States and Territories mentioned.

other States and Territories mentioned. The successful workings of this great discovery has been demonstrated in every instance: wherever fully and thoroughly tested, and has given and now gives general and universal satisfaction, both as to quality of leather and the saving in part of the former expensive material—bark. as can be seen by the attached certificates. This is the on-

to its virtue by the proprietors.

We warrant to manufacture Sole Leather in 90 days; Harness Leather in 50 days; Bridle Leather in 40 days; Upper Leather in 35 days; Kipp Leather in 30 days; Calfskin in 20 to 25 days; Sheepskin in 2 to 3 days

We warrant to save one-third in heavy, and one-

half of the bark formerly used in light stock, ma king heavier leather than can be manufactured with bark alone A superior quality of leather is also warranted to be made under this system. No a terations are necessary or required in the manner of manufacture, but a great saving of labor is saved by not being required to "lay away." and this leather being scoured with great

The great virtue of this discovery consists in the lessening to one-half the expense of tanning by the use of a purely vegetable matter, in con junction with tan bark, which can be at any time. in all seasons, and at any place secured at the limited cost of not more than twenty-five cents to a handred hides

This system having been but recently discovered and patented. November, 1865, has not been very extensively introduced as yet, the commencement having been made by this company, with the patentee in this State, in May, 1865, and is now ceessfully used in the following places, reference to which is made, viz: Green county. INDIANA, PA., Sept 14, 1856 -I take pleasure in certifying that I have thoroughly tested the system of Mr. S. A. Hickel, patented Nov. 7th, 1865, and believe it to possess all the virtues claimed by the patentee, tanning within the time specified and saving fully one half of the bark on light stock and making a pliable, soft, durable and truly superior quality of leather.
GEORGE STADTMILLER.

We hereby certify that we have tested the sys tem of S. A. Hickel, and are now using the same in our yard in Buckhanon, West Virginia, and ecommend it to the community, and especially to tanners, as possessing all that is claimed for it and as giving entire satisfaction.

We take pleasure in certifying that we have tested, and are now using in our tannery at Whit-ley, Greene county, the improved system of Mr. S. A Hickel, patented Nov. 7th, 1865, and recom-mend it to be the cheapest and best mode of tanning, in every respect, making a superior quali-

ty of leather, and rendering better satisfaction than guaranteed to us by the patentee. HARRINGTON & SHAFFER. REVOLUTION IN THE MANUFACTURE OF LEATHER -In November last, Sanford A Hick-el, Esq., of West Virginia, secured a patent for the most important discovery of this century.

The manufacture of leather has been and is now

an exceedingly expensive business, owing greatly to the growing scarcity of the all-important material bark. It has, therefore, for years past, material bark. It has, therefore, for years past, been the great object of our chemists and tanners to discover a substitute for bark or an assistant tanning agent which in a measure would possess the important "tanning acids" and which would thus lessen the use of the expensive bark. Through the great discovery of Mr Hickel, this important tanning agent has been found, in the shape of a simple vegetable matter." by nature already repared as it would seem for the purpose for which it is now, and hereafter to be freewhich it is now, and hereafter to be freely used. The importance of the discovery consists in the abundance of this agent at all times and at all places, of its inexpensive nature, and containing equal if not more tanning acid than the expensive bark, and being used with bark, saving one-half of that expensive material, and making a firmer, stronger, more pliable and heavier article of Leather than can be manufac-

tured with bark alone But this agent possesses additional virtues, as it opens the pores of the hides, and therefore gives immediate access to the acid, and in consequence tans with much more rapidity than bark, thereby saving from one to two-thirds of the time

The discovery of, this tanning material willpermit the manufacture of a superior article of leather at one-half its present expense, and the great saving of time in its manufacture will enable the capitalist to make three returns to his former one. It will likewise enable men of limited means to establish themselves in a lucrative business, which heretofore was barred to small be ginners on account of its expensiveness and Its slow realization. A great reduction in the price of this staple must occur when this system comes into general use, and those who first introduce it will be largely the gainers for it is destined soon to cause a revolution in the Leather market Those who manufacture under the old process cannot possibly compete with those who manufacture under the cheap and rapid process of Mr. Hickel. As no change in the construction of a yard is re-

H. T. HELMBOLD, Druggist: Dear Sir :- I have been a sufferer, for upwards of twenty years, with gravel, bladder, and kidney affections, during which time I have used various medicinal preparations, and been under the treatment of the most eminent physicians, experiencing but little relief.

Having seen your preparations ex-tensively advertised, I consulted with my family physician in regard to using your Extract Buchu.

I did this because I used all kinds of advertised remedies, and had found them worthless. and some quite injurious; in fact. I despaired of ever getting well, and determined to use no remedies unless I knew of the ingredients. It was this that prompted me to use your remedy As you advertised that it was composed of BUCHU, CUBERS, and JUNIPER BERRIES, it occurred to me and my physician as an excellent combination, and, with his advice, after an examination of the article, and consulting again with the druggist, I conculuded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bot-tle I was astonished and gratified at the beneficial effect, and arter using it three weeks, was a-ble to walk out. I felt much like writing you a full statement of my case at the time, but thought my improvement might only be temporary and therefore concluded to defer and see if it would effect a perfect cure, knowing then it would be of greater value to you and more satisfactory to me

I am now able to report that a cure is effected after using the remedy for

five months. I have not used any now for three months, and feel as well in all respects

as I eyer did. Your Buchu being devoid of any unpleasant taste and odor, a nice tonic and invigorator of the system. I do not mean to be without it when ever occasion may require its use in such affections
