DUFF'S COLLEGE CIRCULAR FOR 1867, has just been issued by the Principals of this widely known and favorite Pittsburgh establishment. The publication is in the quarto form, and contains some new and interesting ma ter relative to the course of business education, so long and so successfully taught in the institution. Among other things we notice a beautiful electrotype engraving of Wm. H. Duff's handwriting, in an elegant set of capitals, and an original and animated design of Pen Flourishing, which every one desirous of becoming a master penman, will prize as a gem of the & Son, Pittsburgh, Pa.

"THE OIL CITY REGISTER," is the name of a sprightly little daily just started at Oil City. It is neatly printed, and edited with much ability, and is worthy a liberal support from the citizens of the oil region as, no doubt it will aspire to be the representative of their interests. The Register is edited by W. R. Johns and published by H. S. Dow. We wish them success in their nterprise.

THE EXPRESSION OF DRESS. -- Women are more like flowers than we think. In their dress and adornments they express their nature, as the flowers do in their petals and colors. Some never look or feel better than when dressed in a morning wrapper. Others are not themselves unless they can flame out in gorgeous dyes, like the talip or blush rose. Who has not seen women just like white lilies? We know several double marigolds and poppies. There are women fit onprices. Call without delay, or you may ly for velvets, like the dahlias; others are graceful and airy, like azaleas. Now and then you see hollyhocks and sun-flowers. When women are free to dress as they like, uncontrolled by others, and not limited by circumstances, they do not fail to express their true character, and dress becomes a form of expression very genuine and useful.

OUR SCHOOLDAY VISITOR :- The January number of this young people's periodical has been received. Curtin has approved the bill increasing the power of the Susquehanna Boom Company. Objections having been made by parties engaged in the lumbering trade above and below Williamsport, the Governor caused examinations to be made by James Worrall. Esq., and afterwards by Col. John A. THE LUMBER BUSINESS .- As is usual, with the commencement of winter, no little activity prevails among the lumbermen of this region. Timber-making has been quite brisk, and, during the past week, advantage was taken of the good condition of the roads to do as much hauling as possible. Whilst this is the case, it is difficult to foretell what the extent of the supply will be the coming spring. There is a manifest disposition, however, to manufacture largely, but the stringency of money matters is perceptibly retarding operations in the square timber ine. The condition of monetary affairs is certainly deterring some, who heretofore made, perhaps, one, two or three rafts, from commencing operations, and if this is not changed, will doubtless effect the quantity more than those not conversant with the business might suppose. In the logging line, we are not able to say what is being done, but we are inclined to think that it is bot quite as brisk as it is usually at this season of the year.

THE COW MILKER.-Our farmers' wives will be pleased to learn that a very novel little contrivance has at last been discovered which will relieve them of that cold, wearisome and very unpleasant work of milking a large number of cows by hand. Mr. J. W. Bower, of Bellefonte, is the proprietor of the patent right for the American Cow Milker, for description of which see circulars, and for examing one of the machines call at Richard Mossop's store, Clearfield. The State Agricultural Society's Special Committee say the following :

cerned.

PENN'A STATE AGRICULTURAL SOCETY,

EASTON, September 28th, 1866. One of the principal features of to-day show, was the exhibition, in practical operation, of the American Cow Milker exhibited by the American Cow Milking Machine Co. Three cows were milked to our entire satisfaction, standing perfectly quiet, al-though milked for the first time with the machine

The Cow milker gives sure indication of a complete success, and deserves to acquire by its merits as popular a reputation as the Sewing Machine or Reaper. We give this as a special award and a Diploma.

The total expenditures of the Bureau have been \$1,500,000, and during the ten months to March last, it had issued 8,000,000 rations-two thirds of which were to Southern "chivalry," who are always ready for favors, if not for "subjugation."

13. The death of a remarkable rabbi of the Jewish Church of Germany is announced. M. Frank was a native of Wilna, born in the year 1758, so that he had attained his 108th year. At that advanced period of life he was without any of the infirmities of old age; his bearing was perfect, he read without spectacles, and took long walks up to the last week of his life.

Mr. Jacob Loucks, a respected citizens of Manchester township, York county, and supposed to be the largest man in the courtry, died on Wednesday last a-week, of anoplexy, at the age of fifty-seven years. He was exceedingly corpulent, and was supposed to weigh about five hundred pounds at that time of his death. His coffin measured thirty-five inches in breadth by twentythree inches in depth. His weight was not far from that of Daniel Lambert, of Leicestershire, England, which is given as 528 pounds, and who is said to be the largest man in the world.

DESTRUCTION OF A GREAT VESSEL.-On the night of Dec. 15th, the famous ironclad vessel, New Ironsides, was destroyed by fire in the League Island naval harbor at Philadelphia. The origin of the fire is not known. The New Ironsides was launched 1862, and gained a National reputation by the part she took in the bombardment of

Fort Sumter. Her loss will be regretted more than would that of any other vessel in the American navy. She cost the Gov-ernment \$780,000, and was, perhaps, the finest war ship, of the iron-clad species, in the whole world.
