He was known an 'res-pected by a large number of the citizens of the county with whom his business in former years associated him.

DEATH OF A CITIZEN. -- Mr. Adam C. Flanigan, well known to most of our people, died on Wednesday evening last, of pulminary consumption. He was a young man of good habits, pleasant manners, and a kind heart. He was engaged in the mercantile business until his health failed, and enjoyed the esteem and respect of his fellow citizens in an unusual degree. His afflicted mother has the sympathies of a large circle of friends in her bereavement.

ACCIDENT .- On Wednesday last Mr. John Miller, of Morrisdale, while working at a tram-way, was cut in the foot so badly that it had to be amputated. Another person was driving a stake with an axe, which by some means glanced off and struck Mr. Miller in the ankle joint. Dr J. G. Hartswick of this place, and Dr. Litz of Kylertown being called in, found it necessary to amputate the limb. Mr. Miller is doing as well as could be expected.

BILLS .- In accordance with our custom for several years past, we this week send bills to such of our patrons as are in arrears for subscriptions, etc. The approaching May and June terms of Court will afford a good opportunity to all to liquidate their indebtedness to us, either by calling personally or sending the amount of their bills by a neighbor. Heretofore, most of our friends have punctually responded to requests of this kind, and we feel confident they will be equally punctual now.

TYRONE DOCTORS .- Three Doctors at Tyrone publish a report of a post-mortem examination, for the edification of the public. It is a wonderful production. Tyrone genius must have been exhausted after such an effort as this :

"All the parts presented the most abnormal appearance. The great omentum was entirely destroyed. The peritoneum investing the intestines and parietes of the abdomen was completely disorganized ; (Phew!) but it was upon the viscera in the left side of the abdomen, and especially the deeper seated portions that gave evidence of the most destructive disorganization. The panetes mesentery, transverse descending, and sigmoid flexure of colon, that lay contiguous to the gangrenous end of tumor were entirely divested of peitoneum. (Jehose-phat!) The descending and sigmoid flexure of colon were completely impeded in sanious matter, and were evidently the first points that passed into a state of gangrene. (Shade of Hippocrates !) The pedicle had united promptly to the parietes of the abdomen
