for the farmer.

Go to FARMING. - A good living is what comparatively few men succeed in making The Best and the Cheapest! in village or city life, and yet nothing is more easy of accomplishment on the farm. Besides, there is a pleasure in cultivating and embedishing the earth, improving and increasing its products, and thus adding to the aggregate of human happiness. Why, then, should young men hesitate to become farmers? It is both profitable and honorable. It is the nearest approximation to independence that man, as a member of society, can make. A gentleman farmer-and all farmers are, or should be, gentlemen-belongs to an order of nobility that is not indebted to place-holders for its installation and may, if he chooses, be ranked among the greatest benefactors of the human race. Let all idle young men go to work on farms, and quit seeking third and fourth rate clerkships. In short, go to farming and quit begging.

Food for Cows .- In the correspondence of the Ohio Farmer occurs the following: "I have had twenty-five cows to milk, and found timothy and wild grass the best. To feed in winter, use shorts, ground oats, and corn meal. Shorts make more milk than clear meal; ground oats does better than either; but corn meal with shorts makes richer milk, but no more of it. I have fed potatoes largely; they do tolerably well, but milk a day or two old gets strong. Rutabaga turnips and carrots would not do for me to make butter from the milk; but of all the roots I ever tried, sugar-beet is the best. I heard pumpkins were good to make milk, and tried them. I had twelve milkers; I divided them; fed six with pumpkins three weeks, and all run on grass alike. Those that had pumpkins gave not a gill more milk than the others, but I believe it was a little richer."

APPLE TREE SUCKERS.—The Working Farmer says: "Many otherwise good orchards are allowed to become defaced, as well as seriously injured, by allowing a profusion of suckers to grow at the base of the trunks. Attempts are some times made to get rid of them by cutting them off down to the ground, and leaving considerable portions below in the form of short stumps. These sprout again and they become as bad as ever. A better way is to wait until they are in leaf, at which time they are loosened more readily, and taking each separately in the hands, and placing a thick boot upon it near the tree, they are quickly separated. Toilet Setts. Ac. If done at that time, they will not be likely

PENNYROYAL. - Farmers might easily save the flesh of horses and cows, and confer a great kindness on their animals in preventing the usual annovance of flies, by simply washing the parts with extract of pennyroyal. Flies will not alight a moment on medical purposes. the spot to which this has been applied. Every man who is compassionate to his beast ought to know this simple remedy, and every livery stable and country innought to have a supply on hand for travelers.

STAR LIGHTNING ROD!

The STAR GALVANIZED LIGHTNING Red is supe-The STAR GALVANIZED LIGHTNING ROD is superior to any in use, and will last for generations. It is made from Magnetic Iron—the square-grooved spiral twisted and galvanized, and connected with pure copper couplings, rendering it equal to a corper real-the whole surmounted with a toild-plated cluster point of pure copper, thus forming a continuous red from the point to the ground—the combination of metals forming a galvanie battery in the red.

ground—salvanie battery in the red.

**It is wathenavier always to remain bright and often, and will never corrode or rust, thus presenting a next ornamental appearance on the building, worth more than its cost as a matter of ornament to say nothing about its sure protection

against lightning.
To show the popularity of the Galvanized Star
Rod. it is only necessary to say that the propricloss have pulled off more than one hundred tous
of old rusty irons, within twelve months, from colleges, academies, public buildings, barns, etc., and put up the Star Rod in their place. As the "Sran" is better and sold at a less price than any other rod, is more durable and more or-namental, persons should consult their own inter-ests and safety to life and property, before they have a rod erected on their buildings.

All that is necessary to convince the public of the superiority of the Star Lightning Rod, is a

ientific combination.
