EUREKA! STAR LIGHTNING ROD!

The Best and the Cheapest

The STAR GALVANIZED LIGHTNING ROD is superior to any in use, and will last for generations. It is made from Magnetic Iron—iths square-grooved, spiral-twisted and galvanized, and connected with pure copper couplings, rendering it equal to a copper rod the whole surmounted with a Gold plated cluster point of pure copper, thus forming a continuous rod from the point to the ground—the combination of metals forming a galvanic battery in the rod.

It is wankanted always to remain bright and clear and will never correds or row!

clean, and will never corrode or rust thus prerenting a neat ornamental appearance on the building, worth more than its cost as a watter of ornament, to say nothing about its sure protection

against lightning.

To show the popularity of the Galvanized Star Rod it is only necessary to say that the propri-etors have pulled off more than one hundred tons of old rusty irons, within twelve months, from colleges, academies, public buildings, barns, etc., and put up the Star Rod in their place.

As the "Star" is better and sold at a less price than any other rod. is more durable and more or namental persons should consult their own interests and safety to life and property, before they have a rod erected on their buildings.

All that is necessary to convince the public of the superiority of the Star Lightning Rod. is a thorough examinat on into its construction and

scientific combination.
The undersigued, being the Agents for Clear field county; will put up rods for all who may desire them, on short notice and reasonable terms Call and examine them at their store in Clearfield. June 10, 1868. MERRILL & BIGLER.
