Congress. The Earthquakes in San Francisco.

The recent earthquakes in San Francisco reated a terrible panie. A correspondent states that the streets were filled with men and women in their night clothes, running hither and thither in great alarm. Animals of all kinds felt the shock ; horses became wild gith terror, and some were thrown down by the motion of the earth, while oth ers started and ran away. Dogs were running through the streets and barking, ap-Birds even noticed the great convulsion of nature. But lew persons would enter build oothe him, but without avail; his dulled their favor. But we do not believe that ings, and those would stampede into the streets with a rush whenever a slight vibra tion indicated that the earth was not yet settled. The earthquake took precedence over down burst forth in passionate vehemence everything, business being for the time forfor her son-her tallen son, her fond hope gotten, and all looked as if another night and pride, the prop and stay of her old age might come that would swallow the city; -tor whom she would willingly have laid yet with all this fear the people tried to down her own life. A curious fact has been lately bro't

to notice in regard to the Nevada silver mines. Heat, not water, is the chief enemy encountered after reaching a great depth, and, instead of pumping out water, the companies have to pump in air. A Nevada paper says: "The increase in the heat of our mines is now beginning to give many of our mining companies more trouble, and is proving a great obstacle to mining operations in those levels lying below a depth of one thousand feet than any veins or 'pocket' deposits of water yet encountered. A number of the leading companies on the Comstock are now engaged in putting in engines to be used expressly for driving fans for furnishing air to the lower levels, forcing it through large tubes of galvanized iron. With this great increase of heat in our mines comes a great decrease of water, in fact. in our deepest mine-the Bullton, which has attained the depth of twelve hundred feet-not a drop of water is to be seen; it is as dry as a lime kiln and as hot as an oven. In the lower workings

of the Chollar Potosi mine, which are a perpendicular depth of eleven hundred feet below the surface, the thermometor now stands at one hundred degrees-a frightful heat to be endured by a human being engaged in a kind of labor calling for severe muscular exertion. Here, also, we find the water to have decreased till there is at the present time a very insignificant amount.

it being necessary to run the pump but four hours out of twenty-four."

People who are apprehensive that some of these days this globe may be smashed to atoms by a wandering comet, and who have not been reassured by the assertions of scientific men that comets are mainly composed of gas, may certainly now dismiss their fears. An aerolite, as big as a small comet, has recently fallen on the earth's surface near Warsaw, in Poland, without doing any damage, but, on the contrary, being itself shivered to pieces by concussion with the atmosphere before it reached the ground. It is said to have had a surface of two thousand acres, which by computation would give it a diameter of more than a mile. It first bursted high up in the air, then each of the pieces broke up in turn, until parts of the mass were reduced to powder. One scientific man picked up 949 fragments, another 1,612 and millions more remain strewed over the country. This

Below we give the only returns from this

In this borough the result is very gratifying to the friends of Grant, who increased their vote five since the October election, and consequently reduced the Democratic majority nine, notwithstanding the extraordinary efforts of the Seymourites to swell their vote by running in a gang of persons who, in our opinion, had been sent here expressly for the occasion.

The returns, so far as received, are too meagre to indicate what the Democratic ties, now that the State has been restored majority may be in the county, but, we think, it will not exceed that in October.

HON. G. W. SCOFIELD.-The following paragraph from the "Upper Dauphin Journal," meets our hearty approval, and hence we give it a place in our columns today :

"We are gratified to find that our notice in favor of Mr. Scofield for United States Senator, meets with the approbation of our friends and our prominent Republicans in different parts of the State. We have no 'axe to grind" in this matter, and are only influenced by a desire for the prosperity and welfare of the party, and for the elevation of a man who will reflect honor upon the State and add strength to the loyal party.

Mr. Scofield's experience and services as a member of Congress have fitted] him for the high position for which he is named. and has made the people acquainted with his merits. His locality also is such as to him. We know that other candidates are seeking this office, and it is probable that seuctive influences will be brought to bear in they will be able to create a public sentiment against the importance of electing a first rate man to that position; and we are certain that no man whose locality is favora-, can be selected, that in point of talents and qualifications will compete with Mr. Scofield. It is time, and this will be the occasion. for, the Republican party to rebuke all at tempts to elevate inferior men to important positions. We are aware that Mr. Scofield's friends will have to combat the cupidity and money influence of aspirants and their hopeful backers. We know the position is one to be coveted and aspired after, but the desires of no one should be encouraged who is not fully qualified to fill the position in the ablest and most satisfactory manner."

A DAY OF THANKSGIVING .- His Excelleney, Governor John W. Geary, has pubhely proclaimed Thursday, the 26th day of November, as a day to be set apart by the people of this Commonwealth, for thanksgiving to Almighty God, for the unbroken peace which has reigned within our borders during the past year, for the bountiful har vest just garnered by our people, and for other evidences of the protecting hand of the Almighty. The people of Pennsylvania have never had more reason for the observance of a day by thanksgiving and praise to the Lord for uninterrupted prosperity than has been enjoyed during the past year. The proclamation appears in full in another column.

IMPORTANT REVENUE DECISION .-- The Commissioner of Internal Revenue has had the question propounded to him: "Where an administrator wishes to assign a mortgage not due, to the guardian of decedent's heirs, in order to settle his trust finally. is it necessary to stamp the assingment? No consideration, of course, passing from the guardian to the administrator." To this the following response has been made "I reply to your lettter of the 19th instant. the assingment of a mortgage requires, in every case, the same stamp as a new mort gage, for the sum still secured. The tax does not depend as in the case of a conveyance upon a valuable consideration.

COUNTERFEITERS NABBED. -- Two coun terfeiters of United States fractional curreney, named Edward Rice and George Camp bell, have been nabbed in Canada opposite Detroit. When caught they gave them selves up without extradition, and have been taken to Washington for trial. They were engaged in printing counterfeit fity cent pieces. The detectives found with the rogues soveral plates, dies, presses and oth- the war, held a high rank in our army.
