

For the Farmer.

AN AGRICULTURAL ODE.

This day, two hundred years ago. The wild grapes by the river side. And tasteless ground-nut trailing low. The table of the woods supplied. Unknown the apples red and gold. The blushing tint of peach and pear. The mirror of the pop was told. No tale of orchards ripe and rare. Wild as the fruits he sown to fill. These vales the idle Indian trod; Nor knew the glad, creative skill. The joy of him who trails with God. O painter of the fruits and flowers! We thank thee for thy wise design. Whereby these human hands of ours In nature's garden work with thine. And thanks that from our daily need The joy of simple faith is born, That he who smites the summer weed May trust Thee for the autumn corn. Give fools their gold and knaves their power. Let fortune's bubbles rise and fall; Who sows a field, or trains a flower, Or plants a tree is more than all. For he who blesses most is blessed; And God and man shall own his worth Who toils to leave as a bequest. An added beauty to the earth. And soon or late, to all that sows, The time of harvest shall be given; The flowers shall bloom, the fruit shall grow. If not on earth, at least in heaven.

NOTICE.

CLEARFIELD PLANING MILL ALL RIGHT. Messrs. HOOP, WEAVER & CO., Proprietors, would respectfully inform the citizens of the county that they have completely refitted and supplied their PLANING MILL, in this Borough, with the best and latest improved WOOD WORKING MACHINERY, and are now prepared to execute all orders in their line of business, such as Flooring, Weatherboarding, Sash, Doors, Blinds, Brackets, and Moldings, of all kinds. They have a large stock of dry lumber on hand, and will pay cash for clear stuff, one and a-half inch panel plank preferred. [Nov. 6, '67.]

REMEDY FOR TENDER MOUTH IN HORSES. It is always a desirable point gained to understand the true cause of any effect, wound, disease or complaint. Some horses will always be exceedingly tender in the mouth, while others are sometimes unmanageable. The corrodng of the iron bridle bit in the mouth of a thin-skinned, high-strung animal, will produce canker in the sides of the mouth, just as mechanics often get sores holding out nails in their lips while at work. Sometimes the headstall is buckled up so short that the iron bit is drawn up with much force against the sides of the mouth. If the skin be tender the animal will be liable to have a sore mouth; and the wound will be very tender that scarcely the pressure of the weight of the reins can be endured. Sometimes the check-rein is drawn up unmercifully tight. All such things cause sore mouth.

THE MOST SATISFACTORY REMEDY FOR A SORE MOUTH IS A PREVENTIVE. If the head-stall is too short, lengthen it, so that the bit may ride lower down toward the lips. If the sore is produced by drawing the check-rein too tightly, give it greater length. If the nature of the iron is such that the rust from the bit poisons the tender mouth, let the bit be covered with a piece of firm leather, sewed on with the seam on the lower side of the bit, so that the smooth leather may come in contact with the mouth. Let a heavy piece of calfskin be employed to cover the bit rather than thin, flappy leather. If the iron about the mouth be galvanized thoroughly, that will prevent all corrosion of the iron and consequent injury to the mouth. But, after all the coating is worn off, let the bit be covered with silver plate, which will cost a few dimes. A silver wash will be of little value. But a silver-plated bit will last many years, and will afford perfect security against sore mouth when the cause has been attributed to the rust of the iron. Sometimes the bit is a "twisted bit" with sharp edges, which, being drawn harshly against the mouth will remove the skin.—N. Y. Times.

ROPE HALTERS.—Considerable difficulty is sometimes experienced in handling a new rope, on account of its stiffness. This is especially the case when it is wanted for halters and cattle ties. Every farmer is aware how inconvenient a new stiff halter is to put on and tie up a horse with; and new ropes for tying cattle are frequently unsafe for the reason that they are not pliable enough to knot securely. All this can be remedied, and new rope made as limber and soft as once as after years constant use by simply boiling it for two hours in water. Then hang it in a room, and let it dry out thoroughly. It retains its stiffness until dry, when it becomes perfectly pliable.

THE DEVON IS A NATIVE OF DEVONSHIRE, ENGLAND, FROM WHICH THEY TAKE THEIR NAME. This breed is one among, if not the oldest of the improved English cattle, and until the present century, was bred with greater purity than any other breed.

A NEW FERTILIZER.—Bouche, of France, has invented a process for subjecting the entire bodies of animals to the action of dilute hydrochloric acid, by means of which they are completely dissolved, including the bones, and converted into a uniform pulp, which is inodorous and can be kept for any length of time, to be applied when needed towards fertilizing the soil.

ANOTHER BIG "FLOP!"
