The statement is made that the government has determined upon effective measures for the suppression of Kuklux bands in the south. There has recently been furnished the most satisfactory evidence that these bands of marauders, who respect neither the life nor property of union men, are rapidly increasing in various sections of the south, and notably in central Kentucky. and are becoming more and more a terror to the peaceable inhabitants, and particularly to the union element. It is to be hoped that the government will lose no time and spare no effort in ridding the suffering communities from the ravages of these murderers, who should be dealt with in the most summary manner.
